Ontario is told every lawful morning that
Hon. Wilfrid Laurier stands on a dizzy eminence above the ordinary public men of the

at Ottawa, and only partizan hate would call
him human. Be he man or augel his attihim human. Be he man or augel his atti-Ontario is told every lawful morning that him human. Be he man or angel his attitude just now is subject of discussion among mortals. It is told us with a flourish that he demands that the guilty shall receive strict justice whether Grit or Tory, and that the Parliament of the country must and shall be purified. A very proper demand to make, but when did the leader of the Opposition make this demand? When did he, magnificent man that he is, speak one word in condemnation of Count Mercier and the Quebec steal? When did this image of him human. Be he man or augel his atti-

chance to wing a rival. Neglect There Certainly Was. The Conservative papers of Quebec might very wisely cease attempting to defend Sir Hector Langevin from the charge of incompetence or sad neglect of duty. In this repect he is indefensible, and the more gracefully the truth is acknowledged the better

for him and his life-long shipmates. If the claim is admitted that the Minister of Public Works is not responsible for the honesty of his department, then who is responsible, and what safeguards the interests of the people who supply that department with millions of dollars? It is absurd to endeavor to exconpanied from blame a Minister whose subordeneate from making the breatteneate from blame a Minister whose subordeneate from making the percia in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had gained his perch in might, just as he had dinates made havoc with the public funds. The country at large had nothing directly to do with Perley or Arnoldi who, where known at all, were regarded as a superior pair of servants in Sir Hector's employ. Not to them, but to their master the country looked, and he was expected not only to keep his large had a learn but to force his example.

Men, young, old or middle-aged, who are weak, nervous and exhaused, broken down from overwork or from any cause not mentioned, should send for and read the book of Lubon, a treatise on diseases peculiar to man. Sent sealed, secure from observation, on receipt of 10c. in stamps. Address M. V. Lubon, 50 Front-st. east, Toronto The country at large had nothing directly to own hands clean, but to force his example upon every clerk under him. They were responsible to him and he to the country. Neither was anything asked or expected from Larkin, Connolly and Company from Owen E. Murphy. Whether the or from Owen E. Murphy. Whether the cents. Drugs latter was honest or dishonest the people of Co., Montreal this country, barring the police, for whom this country, barring the police, for whom no one can answer, never gave a thought. It was none of the people's business either, for they were paying an old Parliamentarian of reputed ability \$7000 and sundries to run the Public Works Department for them and Public Works Department for them and saying wages to all the civil were also allowing wages to all the civil service help he required. However we may look at it we find the Minister essentially at fault, for he slept at his post. Real honesty is above price, for the people cannot buy it

with high salaries to their servants. There is a difference between defending Sir Hector from the charges of personal corruption and defending him from the irresistible charge of neglect and mismanagement. The latter is true on the face of it and it discredits the defence made for his honor to dispute so evident a truth. It is a fatal kindness to the man and an injudicious course entirely.

Severe colds are easily cured by the use of Bickle's Anti-Consumptive Syrup, a medicine of extraordinary penetrating and healing properties. It is acknowledged by those who have used it as being the best medicine sold for coughs, colds, inflammation of the lungs and all affections of the throat and chest. Its agreeableness to the taste makes it a favorite with ladies and children.

For some time past there has been growing discontent on the part of property-owners who claim that they are prejudicially affected by the Amelia-street extension bylaw.

The injustice, it is claimed, lies in the fact that property-owners in Winchester-street and Salisproperty-owners in Winchester-street and Sans-bury-avenue who, it is said, receive more ad-vantage by the change than any others, are not assessed, while those who gain but doubtful good have to bear the burden. To be sure it is not much, having been calculated to amount to 24 cents a year for 20 years. The oversight is owing to a mistake of the council in not including the

Comparatively No Damage Done by Frosts—Record Will Be Broken.

The Northwest wheat crop is rounding its Cape Horn of danger, and grain, mercantile, financial men—in fact everybody— are on the qui vive for every item of intelligence re its progress. The frost of Saturday and Sunday has increased this anxiety. Frost to be really dangerous needs, so grain men say, to be 4 to 6 degrees, and this does not cape the state of the store of the same that so many cattle should have been lost. There must have been something wrong with the accommodation of the ship. We often experience complete the cross often lay to for a whole day or go a few points out of their course in order to protect their cargo of live stock. "Such a terrible loss of life as that on board the Loch Lomond tends to injure the Canadian cattle trade. The Right Hon. Henry Chaplin, the Minister of Agriculture in Salisburg's cablnet, is only too auxious to use the Loch Lomond case as an argument in behalf of his view. By all means let there be an investigation."
