

Miscellaneous.

Sanford Doud, of Doud's Station, Iowa, is dandling his 32nd baby on his knee. He is 70 years old.
During the Crimean war 401,000 men died and were killed on the little peninsula which was the scene of operations.
New York handles about 5000 Atlantic salmon per annum. The market price for finished skins is \$30 to \$48 per dozen, with a somewhat higher price for extra fine.

WESTERN COUNTRIES RAILWAY. — The Western Counties Railway Company has made financial arrangements with the local and Dominion Governments, which, it is believed, will ensure the completion of the line at an early date.
We are informed by an old fisherman that while crossing the river lately near Newcastle, he witnessed what he had not seen before for thirty years, viz: large quantities of young salmon about six inches long going down the river on their way to sea. — Halifax Glazier.

SHIPPING. — Shipbuilding is unusually active this season in Bath, Me. At no time since the war has there been so many vessels building, twenty-three being on the stocks at the present time. In stead of shrinking in valuation during the past few years, Bath makes an increase this year over last.
EXTENSIVE FARMING. — We have been informed that the Hon. J. C. Pope, of Charlottetown, has put in a very large quantity of seed this spring, consisting of 750 bushels of oats, 250 bushels of barley, 25 acres of potatoes, 25 acres of turnips, and 10 acres of wheat, besides all the other varieties usually required upon a farm. — Souris Times.

Baltimore has a steam yacht belonging to a firm of nautical instrument makers, which boards all vessels arriving at that port, takes their chronometers for safe keeping, rates the instruments by standard Greenwich time, and delivers them up in good order when the vessels are ready to go to sea again.
ANNUAL MEETING OF NOVA SCOTIA LLOYD'S MARINE INSURANCE ASSOCIATION.
The annual meeting of this Association took place on Thursday last, at their rooms, over the store of Messrs. A. W. Corbett & Son. A dividend of \$200 per share was declared payable after Tuesday, 19th of June. The business of this Association is in a healthy condition. — Journal.

GOOD FISHING.
The schooner "Hero," owned and commanded by Capt. John Dorsey, of Trout Cove, ran into our harbor last night for supplies. The captain states that the cod was plentiful, he having taken upwards of 300 quintals since the beginning of the season, and only requires forty more tubs to complete the drier. The captain's brother, Joseph, who is fishing on LaHave Banks, in the schooner "Sea Bird," owned at Bear River carries the high line, he having captured between 600 and 700 quintals. — Digby Courier.

THE FISHERY COMMISSION commenced its sitting in the Legislative Council Chamber at 2 p. m. to day. It has been decided to exclude the press and the outside public from its deliberations, though as different points are raised the information will be made public. It is not deemed advisable to have all the various propositions that may be made from time to time published until they are accepted or rejected. It is probable that, after one or two sittings, the Commission will adjourn for some weeks to enable papers submitted to be printed and to give the representatives an opportunity to more fully prepare their case. — Recorder.

While the children of Judge Winchester of Granby, Me., were returning home, the other day, and were crossing a stream, the wagon, which had come uncoupled from the front wheels and rushed down stream. A daughter of Mr. Winchester, only 12 years old, comprehending the danger of the wagon's capsizing, coolly picked up each one of the little children and threw them out, while the men caught them as they splashed in the water near the edge of the bank. After all had been rescued she leaped from the wagon, and was caught up by the willing hands on the bank at the instant the wagon capsized.
The San Francisco "Chronicle" throws some new light upon the popular superstition relating to Chinese articles of diet. It says that the idea that griled rats are an esteemed dainty with the Chinese epicures is not verified by an inspection of the Chinese markets and game shops, or any apparent depletion of that species of vermin in the Mongolian quarter. But if there is anything more than another that the aristocratic Chinese palate relishes it is a good fat cat. This species of game is always marketable among them at a round price, and felines in good condition of flesh that expose themselves in the vicinity of a Chinese community are liable to be snatched up and sent to pot at any moment.

THE DEAD ALIVE.
It will be remembered that some time ago two men belonged to a Herring Cove fishing schooner left their vessel in a dory to look after their trawls. After they left the dory, a thick fog came up and some hours having passed without their returning guns were fired to let them know the whereabouts of the schooner. When the fog cleared off no sign of boat or men could be seen, and after cruising about for a whole day the schooner returned to port. It was believed that the boat had been run down by a passing steamer, as the whistle of a vessel in the fog had been picked up by a dory. The two men were given up as dead. On Saturday, however, the mother of one of them received a letter from him, stating that they had just left the vessel in the fog and had been picked up by a brigantine bound to the West Indies, where they had arrived both safe and well. — Halifax Chronicle.

THE POTATO BUG.

A clergyman from the country has communicated to the Monitor an interesting communication upon the potato bug. He says that the insect is committing great ravages in the Montreal district; that the farmers are doing everything in their power to destroy them, and save a portion of their crop, but for all that they may be certain that potatoes will be dear next winter. He narates one curious fact:—A farmer belonging to his parish sowed buckwheat with his potatoes. Since the fly has made its appearance this farmer's potatoes have not been touched, though his neighbors are suffering. The buckwheat has, in blossom, appeared better than those of the potato, and seem to be a preventive, by scaring away the insect. If the result be general a better remedy than Paris green is close at hand.

POOR PEACE PROSPECTS.
A correspondent of the "London News" at Bucharest telegraphs as follows:—On the Russian army any fore-shadowing of peace would fall with a thrill of passionate disgust that would beget with its discipline to the utmost. There can be no question that the army regard Constantinople as the only goal that can content it. Under stand it settles, that the Emperor will order to Russia immediately after he has witnessed and participated in the passage of the Danube. There are now comparatively few Russian officers in Bucharest. Their duties call them away. A correspondent at the Russian headquarters professes further details of Gortschakoff's reply to Derby as follows:—"If the Turks make peace directly Russia crosses the Balkan Mountains, the Russians will be ready to accept peace, but otherwise she has no alternative but conquer and dictate to the Porte. If England wishes to prevent the Russians entering Constantinople, she has only to exert her influence upon the Turks in order to induce them to yield immediately the Balkans are passed." It is only fair to say that the idea among the Russians is that their peace is not sufficient. Bulgaria must become an independent as Serbia and Roumania. The "Times" financially notes that an over-strained feeling is again taking hold of the public mind relative to Eastern affairs.

AN ODD FAMILY.
Potter's "American Monthly" has the following in Notes and Queries:
In the reign of King William the Third, there lived at Ipswich, in Suffolk, a family, which from the number of peculiarities belonging to it, was distinguished by the name of Odd Family. Every event, remarkably good or bad, happened to this family in an odd year, or an odd day of the month, and every one of them had something odd in his or her person, manner and behavior. The very letters of their Christian names always happened to be of an odd number. The husband's name was Peter, and the wife's Rahab; they had seven children, all boys, viz: Solomon, Roger, James, Matthew, Jonas, David, and Ezekiel. The husband had but one leg, and his wife one arm. Solomon was born blind of his left eye, and Roger lost his right eye by accident; James had his left ear pulled off by a boy in a quarrel; Matthew was born with only three fingers on his right hand. Jonas had a stump foot, and David was humpbacked; all these, except David, were remarkably short, and Ezekiel was six feet two inches high at the age of nineteen. This stump foot Jonas and the humpback David got wives of fortune, but no girl would listen to the addresses of the rest. The husband's hair was as black as jet, and the wife's as remarkably white, yet every one of their children had red hair. The husband had the peculiar misfortune of falling on his head deep snow, where he was staved to death, in the year 1691, and the wife refusing all kind of sustenance died in five days after him. In the year 1703, Ezekiel enlisted as a grenadier, and in although he was afterwards wounded in twenty-three places, he recovered. Roger, James, Matthew, Jonas and David died at different places on the same day, in the year 1713, and Solomon and Ezekiel were drowned together in crossing the Thames in 1723.

THE FISHERY COMMISSION.
The Fishery Commission adjourned on Saturday until the 28th of July. All the business yet done has been of a preliminary character. The case of Canada—of Great Britain, as it has to be called in these proceedings, Canada having no right to engage in diplomatic affairs with foreign powers except in the name of the mother country—has been presented and the work of the Commission mapped out. The United States agent is required to file his answer to the British case on or before July 7th, and the British counter-case is to be filed on or before the 25th of the same month. This will put the affair in a position to be dealt with by the Commission, which is to re-assemble on the 28th to commence taking evidence. A period of forty-four days, extending to September 10th, will be allowed for the reception of evidence on the British side. Then a similar period, extending to the 23rd of October, will be allowed for the production of evidence on the American side. From October 24th to November 6th, a period of 12 days, will be allowed for rebutting evidence on the British side. Then six days will be given to the Americans for the presentation of their argument, which is to be in writing, and six more days to the British counsel for their counter-argument. This will bring the Commission to the 19th of November after which no further evidence or argument will be received. The evidence and arguments will then be placed in the hands of the Commissioners who will have nearly a month to consider them and come to a conclusion. The Commission was organized on the 15th of June, according to the terms of the Treaty of Washington, must conclude its work within six months—that is, by December 15th. The witnesses will be examined on the 10th. — Chronicle.

MURDERED BY A MEXICAN.
Private letters received in Weymouth from California, give particulars of a tragedy which took place in Southern California recently, by which Mr. Chas. Cleary, a brother-in-law of Dr. Morse, of Weymouth, was killed. The gentleman was stabbed by a Mexican chief in the breast, from the effects of which he died in three hours. Two of the outlaws who assisted in the murder have been arrested, but the man who committed the murderous act has not yet been captured. — Digby Courier.

Telegraphic News.

EUROPE.
ROME, June 15.—The Canadian pilgrims had an audience with the Pope to-day, and asked his benediction for their countrymen and the people of Liverpool and New York who gave them a friendly reception. The pilgrims presented the Pope with a magnificent mitre, studded with gems, a silver vase, and \$20,000. The Pope expressed joy at the escape of the pilgrims from the great perils of their voyage, and at the many signs of devotion from a country where faith, after surmounting so many dangers, still remained so strong and vigorous. He concluded by giving his blessing to the pilgrims.
RACONA, June 17.—Intelligence has been received from Slavonic sources that there was a sanguinary engagement, lasting throughout Saturday, between 10,000 Turks and 3,000 Montenegrins at Rason. The Turks were defeated and pursued to Spuz, leaving 2,000 dead on the field.
On the southern frontier of Montenegro the Turks were totally defeated by Gen. Petrovics in an engagement before Danilovgrad. Mehemet Ali telegraphs to the Porte from Kolachin, stating that the Montenegrins have totally defeated the Montenegrins in the neighboring forest, the latter losing upwards of 200 killed.
On the northern frontier of Montenegro the Turks were totally defeated by Gen. Petrovics in an engagement before Danilovgrad. Mehemet Ali telegraphs to the Porte from Kolachin, stating that the Montenegrins have totally defeated the Montenegrins in the neighboring forest, the latter losing upwards of 200 killed.
Ottoman troops have returned to Kolachin.
An order has been issued dismissing Bulgarians in the capital from Government telegraphic posts.
Three years' taxes in advance are demanded from Roums.
LONDON, June 17.—The British Ministry has decided to await the course of the war, as they may better decide what course to adopt.
In Asia, the principal feature this week have been the partial withdrawal of the Russian right wing, and the closer investment of Kars and Batoum.
The total Russian force available for active operations in Asia Minor is about 140,000—40,000 at Kars, 20,000 between Kars and Batoum, and 80,000 between Kars and the line of Bayazid and Topak Kalch, leaving about 40,000 for the centre against Akkhar Pasha's 40,000 in a strong position.
The Russian army has no men to spare if they intend to keep the country they have so far occupied.
The Russians are doing their work thoroughly and systematically, assuming administration over the country as they advance.

COSTANTINOPLE, June 17.—The great martial trying officers of Genoa's "Sard," destroyed by torpedoes in the Danube, has concluded its labors, and it is believed the prisoners will be sentence to be shot.
The Egyptian contingent have arrived. Mukhtar Pasha is to retain his command. Great inundations on the Don and Danube are reported from Russia.
There has been dangerous outbreaks from 15 to 20 thousand mounted Arabs in the district between Damascus and Aleppo. The country is almost deserted.
Such news is reported in Paris despatch to the Manchester Guardian, June 14th; it was then stated that 12,000 rebel horsemen had been defeated by Ottoman troops in a strong position in Syria.
The Russian army has no men to spare if they intend to keep the country they have so far occupied.

UNITED STATES.
WASHINGTON, June 14.—The issue of one and two dollar greenbacks discontinued at the Treasury in this city mainly to induce banks and individuals to take and put in circulation silver coin. Silver is now going out of the Treasury rapidly—about a million dollars a month.
NORTHAMPTON, Mass., June 14.—A violent tornado passed over Connecticut Valley this p. m. The highway bridge over the Connecticut River, at Northampton, was completely destroyed. There were 16 people on it at the time, and two were killed and a number hurt. The bridge was 21 feet high, resting on light stone piers and cost \$25,000. Another bridge was also blown away. Trees were snapped off and uprooted, buildings blown down and great damage done to the crops.
NEW YORK, June 17.—A dispatch from special says:—An officer high in the confidence of the Russian Government says the relations between Russia and England are of the most critical nature. The two countries stand on the very verge of hostilities and the slightest indication might at any time precipitate a conflict. The cause of the English throwing her moral influence in favor of Turkey, and thus encouraging the Porte to take action which would not be ventured upon but for the reliance placed on the ultimate aid of England. Count Schouvaloff is instructed to represent to England the serious concern of the Emperor and to intimate in plain terms that Russia did not build up the system and light on foot provided the present suspense were put an end to. Count Schouvaloff is also instructed to say explicitly that war would be preferable to the present uncertainty of this uncertainty is of considerable advantage to the Turks, and actual hostilities on the part of England could not be more disadvantageous to Russia. Russia wants England to speak out definitely whether she means to fight or not, and will probably insist on the discontinuance of almost open support given to Turkey, and on a more exact observance of neutrality. In Berlin the belief is gaining ground that Russia is determined to take such action as will force England to declare herself definitely. Prince Bismarck, it is said, is strongly in favor of the Gortschakoff note and entirely disapproves of the vague and uncertain attitude of England. According to reports received in Berlin, Earl Derby does not intend for the present to reply to Gortschakoff's note.

THE VICTORIA BRIDGE at Bear River, is in a dangerous condition. Last Tuesday morning one of the piers sank five or six feet, and since travel has been very much impeded. Workmen have blocked up the hollows in it so that with cautious steps the pedestrian can cross. But the whole fabric is liable to give way at any moment. When the buttresses were built for this bridge, piles were driven down for foundation, but not being able to withstand the ravages of the sea worms long, gave out, with above results. We understand that \$400 have only recently been expended to repair the top of it. — Journal.

GOLD LEASE.—On Friday last a prospecting party at Boule struck a gold vein, four and a half feet thick, which promises to be very rich. The tract in which this lead lie was prospected by a party of Germans who, evidently, did not understand the business, for they rejected it as worthless. Gold mining in this Province is more active than ever, and the results are very gratifying. — Recorder.

A DIRE CALAMITY.

From the Liverpool Courier, May 24th.]
The balloon accident in Hull on Monday night last turned out more serious than was at first anticipated. The accident was caused by the gas of a monster balloon being accidentally liberated over a crowd, and the persons and striking fire. The preparations for the balloon ascent were completed about 7 o'clock, and at that time the balloon was about three parts full of gas. The "Queen" of the name of the balloon, is stated to have been capable of holding 30,000 feet of gas, and it is roughly estimated that from 20,000 to 30,000 were in it just before the accident. Two men were in the car, one being Mr. J. Metcalf, the proprietor, and the other a Mr. J. Whitaker, of Hull, who had volunteered to surround the balloon, and numbers of ladies clustered to the number of 80 or 100. About 7.30 the balloon came violently in contact with a striking-machine, which ripped it open, and the gas rapidly escaped. A bogie fire, belonging to the car, was the cause of the explosion, and the wind driving the gas over it, there was an instant ignition of the escaping gas, which was communicated with that in the balloon, and the latter burst. A number of ladies and a young girl, who had been sitting on a bench in the crowd, were killed, and many others were injured.

Great consternation followed, and there were loud screams from the assembled persons and those who had been clustered to the number of 80 or 100. The fire, which was burning to leeward, and the wind driving the gas over it, there was an instant ignition of the escaping gas, which was communicated with that in the balloon, and the latter burst. A number of ladies and a young girl, who had been sitting on a bench in the crowd, were killed, and many others were injured.

Halifax Produce Price List for the week.
Butter per lb. 10 00 to 10 25
Eggs per doz. 11 00 to 12
