

Stop an Earache
—or any other kind of ache or pain.
Use a remedy that you can depend upon.
You don't take any chances with **Johnson's Anodyne Liniment**—it has a 97 years' record of successful cures to prove its reliability. If you have an earache, headache, or stiff neck, just apply

JOHNSON'S ANODYNE LINIMENT

It's just as effective in healing cuts, burns, scalds, bruises and contusions—just as sure in curing lame back, muscular rheumatism, sciatica, lumbago, stiff joints, strained tendons and all the other aches which the body is heir to. Don't delay—apply at once—the sooner you do it the quicker you are well. Get a bottle now—have guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number, 515.

AS CENT'S A BOTTLE—SOME WILL BUY THREE TIMES AS MUCH AS WILL.

L. S. JOHNSON & CO., Boston, Mass.

RECORD CROPS FOR AMERICAE FARMERS
New York, June 12.—A despatch to The World from Washington says:—The crops of 1908 will be worth nearly \$8,000,000,000, according to figures prepared by Department of Agriculture officials. Chief Statistician Clark said today:—"Indications are for great crops. For eight years the American farmer has enjoyed unprecedented prosperity and now the ninth promising harvest is practically assured. Never have there been nine such years of big yields and high prices."

THOUSANDS ARE STARVING IN SOUTHERN CHINA
Hong Kong, July 2.—Reports from the Reds in Southern China show that hundreds of people have been drowned and thousands are starving. Agriculture officials and foreign missionaries are combining to raise a large relief fund. Large quantities of food are being consigned nightly from Hong Kong. The government has made a grant of thirty thousand dollars and Standard Oil Company has subscribed \$5,000.

Joker's Corner.

MORE SIMPLICITY NEEDED.
"It was not," confessed a woman, "until a member of my family became ill with nervous prostration, and our physician prescribed rest, pure air, simple diet, and no end of outdoor life that I discovered how really apart from this regimen was our daily living. Before this I should have said offhand that we lived simply and hygienically, and that ventilation and plenty of outdoor exercise was considered by the entire household. Viewing all these things, however, as remedies for a threatened invalidism, I soon found that the rules went on pretty regularly right in my own modest establishment. I have changed the menu of our meals very radically; I have found that it is possible to keep the house better ventilated than it used to be; I have suppressed with benefit a good deal of the inconsequent going and coming that contributed to our general restlessness, and I am watchful that all of us get more outdoor life than we did. It is easy to slip into careless ruts even with good intentions and plenty of knowledge.—Exchange.

THE CANNY SCOT.
Two Highland farmers met on their way to church.
"Man," said one to the other, "I was wonderin' what you would be asin' for you bit sheep over there?"
"Man," was the reply, "I was thinkin' I wad be wantin' fifty shillins for that sheep."
"I will tak' it at that," said the would-be buyer; "but, eh, man, Dougal, I am awfl surprised at you doin' business on the Sabbath."
"Business!" exclaimed Dougal. "Man, sellin' a sheep like that for fifty shillins is no business at all—it's just charity!"

HE WAS PREPARED.
Little Tommy had been forbidden to swim in the river, owing to the danger. One day he came home with unmistakable signs of having been in the water. His mother scolded him severely.
"But I was tempted so badly, mother," said Tommy.
"That's all very well. But how'd you come to have your bathing suit with you?"
Tommy paused, and then said:
"Well, mother, I took my bathing suit with me, thinking I might be tempted."
A lawyer was consulted not long since by a colored man, who complained that another negro owed him \$3, a debt which he absolutely refused to discharge. The creditor, to no purpose. "What reason does he give for refusing to pay you?" asked the lawyer. "Why, boss," said the darkey, "he said he done owed me that money for so long a time dat de interest had et it all up, and he didn't owe me a cent."

NO FUN FOR TOM.
Tom—I don't think I'll marry Miss Golding after all.
Jack—But I thought you were quite fond of her?
Tom—Well, I used to be, but I'm getting tired of hearing her say "no" every time I propose to her.—Chicago News.

HOPE FOR MACEDONIA.
One of the results of King Edward's visit to the Emperor of Russia is likely to be highly beneficial. Macedonia has been for some years the scene of European diplomacy. Murder, arson, robbery, torture, lawlessness of all kinds have prevailed, and remedial measures have been hitherto in vain owing to the policy of the Sultan of Turkey, and his policy has been persisted in because Germany backs him up in it. If peace and order are established in Macedonia it will be a new chapter in the sad story of the North-East.

The Age of the Earth

(From the Scientific American.)
In the proceedings of the American Philosophical Society, Professor T. J. See, U. S. N., has a memoir on the cooling of the earth and the theory of earthquakes held by the ancients. In part the memoir is a further elaboration of the paper published last March by Professor See to show that earthquakes are due primarily to the seepage of water through the ocean's bottom.
For almost a century scientists generally have held that the earth is cooling, and therefore slowly contracting. In this way they explain earthquakes and mountain formations. Now comes Professor See with an elaborate argument more exhaustive than that of Lord Kelvin, tending to show that the effects of secular cooling of the globe are insensible, and totally denying the contraction of the earth.
Professor See's memoir may be summarized as follows: The earth's temperature has an elliptical distribution within the green Fahrenheit at the centre, falling off toward the surface, where it is zero. As the earth slowly cooled, the crust was the only part which experienced an appreciable fall in temperature.
Hence the crust is thin, with a thickness of not more than twenty miles, which agrees with the deductions from the study of the world shaking earthquakes. The great earthquakes originate at the depth of about twenty miles, and none is known of a depth exceeding forty miles.
As the earthquakes all have superficial origin, and no shakes have a deeper source, it follows that there is no deep-seated contraction of the earth. Consequently all changes in the crust are due to ordinary earthquakes, and to no other cause.
Secular cooling is infinitely slow, and affects only the crust, whereas, world-shaking earthquakes proceed from the layer just beneath the crust. This eventually pushes out at the sides and raises mountains along the coasts.
As the effects of secular cooling are insensible, it follows that the earth is not contracting, as held in the books for three generations. Dr. See shows, indeed, that at an early stage of the earth's history, contraction was going on, but it ceased after our planet became incrustated. In fact, he thinks that so far from contracting, the earth may now be slightly expanding, owing to the formation of pumice everywhere beneath the crust.
The old theories that mountains are due to the secular cooling and contraction of the globe must therefore be abandoned. The mountains are formed by the expulsion of lava from beneath the sea, and hence they are parallel to the coast.
Dr. See concludes by a mathematical inquiry showing that the age of our incrustated earth does not exceed some ten millions years, which is much shorter time than geologists generally allowed. He also finds that radium plays no important part in the development of the globe.
Professor See translates Aristotle's theory of earthquakes, which has never before been made accessible to English readers. The Greeks all held that earthquakes are due to agitation of vapors within the earth, which tended to escape and diffuse themselves in the atmosphere. Aristotle observed the eruption of a volcano and concluded that all earthquakes were due to the same cause as that producing eruptions.
When Plato was fifty-four and at the head of the Academy in Athens and Aristotle was a boy eleven years old, the Homeric city of Helike, on the southern shore of the Gulf of Corinth, was thrown down by an earthquake and overwhelmed by a seismic sea wave.
The cause of this disaster perplexed the Athenian sages, and has remained one of the mysteries of the centuries. Now comes Professor See, who shows that it was due simply to the expulsion of lava from beneath the Gulf of Corinth, which upheaved the sea bottom unstable, and when it gave way it also carried the shore on which Helike stood, indeed, the city was first devastated by the movement of lava beneath the crust, and afterward subsided about one hundred feet, so that it was covered by the waves until only the tops of trees remained above water.
Besides the sinking of Helike, other cases of the subsidence of the land are mentioned, and in the concluding note attention is called to the elevation of the mountains and the sinking of the sea bottom now going on in the vicinity of north Pacific.
The leading forist of Halifax says "Campbell's Neco Soap is the best insecticide we have used."

MINARD'S LINIMENT CO., Limited

Gentle—I cured a valuable hunting dog of mange with MINARD'S LINIMENT after several veterinaries had treated him without doing him any permanent good.
Yours, etc.,
WILFRID GAGNER,
Prop. of Grand Central Hotel,
Drummondville, Aug. 3, '04.

Boston via Yarmouth
"Land of Evangeline" Route.

FOR BRIDGETOWN.

On and after June 29th, 1908, the Steamship and Train Service to this place will be as follows (Sunday excepted):
FOR BRIDGETOWN.
Express from Halifax, ... 11:34 p. m.
Express from Yarmouth, ... 2:12 p. m.
Express from Richmond, ... 5:15 p. m.
Accom. from Annapolis, ... 7:20 p. m.

Midland Division
Trains of the Midland Division leave Windsor daily, (except Sunday) for Truro at 7:25 a. m. and 5:15 p. m., 6:25 a. m. and 2:30 p. m., respectively, and with trains of the Intercolonial Railway, and at Windsor with express and Bluenose trains to and from Halifax and Yarmouth.

Boston Service

ROYAL MAIL S. S. PRINCE GEORGE AND PRINCE ARTHUR.
By far the finest and fastest steamers plying out of Boston, leave Yarmouth, N. S., daily (except Sunday) immediately on arrival of express and Bluenose trains from Halifax, arriving in Boston next morning. Returning, leaves Long Wharf, Boston, daily (except Sunday), at 2:10 p. m.

St. JOHN and DIGBY
ROYAL MAIL S. S. PRINCE RUPERT.
Daily Service (Sunday excepted).
Leaves St. John, ... 7:45 a. m.
Arrives in Digby, ... 10:45 a. m.
Leaves Digby same day after arrival of express train from Halifax.
S. S. Prince Albert makes daily trips (Sunday excepted) between Parrsboro and Wolfville, calling at Kingsport in both directions.
P. GIFFRINS,
General Manager,
Kentville.

If You Want Light, White Bread and Light, Tasty Pastry

every time you bake—use **Beaver Flour**.
If you want a flour that makes the Best Rolls and Biscuits—and the Best Cakes and Pies—use **Beaver Flour**.
If you want flour that yields the most Bread and Pastry to the barrel—use **Beaver Flour**.
Beaver Flour is a blend of Ontario and Manitoba wheat. It contains the nourishing gluten and other food properties of Manitoba wheat and the famous pastry-making qualities of Ontario wheat. You really get two flours in one—and the best of both—when you buy **Beaver Flour**.

At Your Grocer's.
Dealers, write for prices on all kinds of Feeds, Coarse Grains and Cereals.

THE TAYLOR CO. Limited, Chatham, Ont.

Bridgetown Clothing Store.

Now is the time to be looking after clothes to keep you cool. Don't forget that we can fit you out in all that the men and boys need in this line. A call at our store will convince you that we carry the best assortment. Negligee shirts in great variety. New Neckwear, Hosiery, etc., to suit all.

J. Harry Hicks, QUEEN ST.

Not a Miracle But Medical Science

Dr. T. A. Slocum Limited, Toronto, Ont.
Gentlemen:—
"Some time ago I began to lose flesh and failed every day until I had to quit work. My physicians and all my friends said I had contracted consumption. I failed from 165 pounds down to 119. I was advised to go to the Rockies or to the coast. I went to both places under heavy expense. I continued to fail, and was advised by the doctors to come home as nothing more could be done for me. Hope seemed to have left me.
"I tried Psychology and since starting its use I have gained from 119 to 141 pounds. I have used \$100 worth of the medicine. I am a well man and I cannot say too much in praise of Psychology. The strongest recommendation would be weak in view of the fact that I believe it has saved my life. It is without doubt the best remedy for run-down conditions and weak lungs.
"I sincerely hope and trust that you will continue your good work of saving run down people and consumptive from the grave. Wishing you and Psychology continued success, I remain, one of Psychology's best friends."
ALEX. McRAE,
Sault Ste. Marie, Ont.
Almost every mail brings us letters like the above. Psychology will repeat this record in every case. It is the greatest medicine known. It is all drugists, 50c and \$1.00, or Dr. T. A. Slocum, Limited, Toronto.

FLUE-CLEANING
—a dirty, heart-breaking job—
AND
FLUE-CLEANING
—a clean, record-breaking job—

THE FLUE DOORS
Situating "singly" over feed door—on some furnaces.
Situating "doubly," same distance from each other, same distance from feed door—on "Sunshine" Furnace.

"SUNSHINE" ADVANTAGE:
Operator can easily clean every bit of soot out of radiator.

THE OPERATION
Fire put out, smoke-pipe pulled down—on some furnaces.
Fire stays in, smoke-pipe stays up—on "Sunshine" Furnace.

"SUNSHINE" ADVANTAGE: Furnace can be cleaned out any time in season without trouble, dirt, or "fear of chilling the house."
