Experimental Peach Shipments

J. A. Ruddick, Ottawa, Dairy and Cold Storage Commissionaire

The Dominion Department of Agriculture is arranging to further test the practicability of shipping peaches to Great Britain. Probably about 2,000 cases will be purchased from the St. Catharines Cold Storage Co., at the price per pound which is paid by the canning companies, plus the extra expense of special packing. The peaches are to be packed in single layer cases, having the standard dimensions of 20 x 11 inches and three and one-half inches in depth. The peaches will be wrapped in paper and packed in wood wool. If these peaches realize more than the price agreed upon, the surplus will be distributed among the growers.

It is expected that shipments will be made on September 17th and 24th, and October 1st to London, Liverpool and Glasgow. A small shipment will also be made to Bristol on September 15th.

The matter of shipment to the sea-board has been very carefully considered. Some of the growers have favored express shipment, but after considering our own experience as well as the experience of others in connection with such shipments, we have arrived at the conclusion that shipment by refrigerator car will be preferable. In order to catch the Saturday steamer, the Express shipments would require to leave St. Catharines on Thursday. The same steamer will be reached by refrigerator car freight service, leaving on Wednesday. The refrigerator car can be switched alongside the steamer at Montreal. We believe that the matter of cool shipment is of greater importance than one day more or less in transit.

NINETY ACRES LAND, two houses, fifty acres in Peaches; twenty acres, Berries, Plums, Apples; ten, Woods. Mile to station. Twenty thousand. Seventy acres land, fine brick house, barn, eight thousand seven hundred. Ten fine small fruit farms.—Widdicombe, 21 James, St. Catharines.

WILD LANDS in blocks of 80 to 5,000 acres, in West Kootenay, British Columbia. Price depends on accessibility, value of timber and percentage of good land. State what is wanted, and terms preferred. If maps wanted, send \$1.00. Enquiries wanted from prospective purchasers, not agents. J. D. Anderson, Government Surveyor, Trail, B. C.

Items of Interest

A writ has been issued by The King Construction Co., of Toronto against W. F. Adams, and A. S. Jennings & Co., of the same city for infringement of patents No. 70769, and 97843, granted respectively in the years 1901 and 1906 by the Canadian Government to Rebt. W. King, controlled in Canada by the Company above referred to. This action results from an exhibition of a sash bar bracket at the florists' convention lately held in St. Catharines, Ont.

"Turns the soil better"

The Bissell

Because of their shape, plates of "Bissell"

Orchard Harrows turn over soil cleaner, better than you've been accustomed to have it done. Attach wings and Harrow extends out 12 ft. or more to cultivate under limbs of trees—closes up narrow enough to cultivate between grape vines. Combination Harrow too—reversible from "Out Throw" to "In Throw." Low seat, well-braced frame. Ask your dealer for information or write Dept. N.
