Scientific and Useful.

PRESSED VEAL.—Take three pounds of
veal chopped fine, two pounds of fresh, lean,
pork, also chopped fine, three eggs, a
piece of butter the size of an egg; pepper
and salt well; bake two hours. When cold
slice it thin. It is like pressed meat, and is
very nice.

CORN BREAD.—Steamed corn bread is
particularly wholesome when made with but-
termilk. If this cannot be procured, use
lobbered milk. To two cups of Indian meal
allow one cup of white flour, two tablepoon-
fuls of white sugar, two and a half cups of
milk, one teaspoonful of soda, one of salt,
one tablepoonful and a half of melted but-
ter; steam for two hours in a well-buttered
tin, and dry off in the oven.

DESSERT.—A delicious dish for dessert,
to be served with white and fruit cakes, is
made by taking one pint of thick, sweet
cream, and beating it until it is very light;
then add the grated rind of one large lemon
and the juice of two; half a pound of pul-
verized sugar must then be stirred with the
cream. Serve this in wine glasses, or in
small china cups that will hold as much as
the after-dinner coffee cups.

CHOCOLATE CREAMS.—Two cups of gran-
ulated sugar, half a cup of milk. Boil just
five minutes. Then take it from the stove
and stir it till it is stiff, then drop on but-
tered plates and leave till cold. While it is
cooling break a square of Baker's chocolate
in small pieces in a bowl, and set it over a
teakettle in which the water is boiling. After
it is melted, then take the drops and with a
fork roll them in the melted chocolate: then
lay on the plates till cold.

LEMON PICKLES.—Put in a jar one teacup
of common salt, pour over it one pint of boil-
ing water, and put the lemons into this,
cover it over with a plate, and leave it for
five days. Drain off the salt and water and
add fresh, and at the end of ten days let the
lemons drain again. The pour over them as
much hot vinegar as will cover them, with
plenty of cayenne pepper and ginger, and a
little shallot. Tie down the pots, and look
to them occasionally as the vinegar wastes.

OMELETTE.—A delicate omelette is made
thus: Beat the yolks of four eggs, and while
beating mix with them a teaspoonful of flour,
two tablepoonfuls of pulverized sugar, a
pinch of salt, and any flavouring extract
that you choose, this, of course, can be de-
cided with reference to the other dishes
which make up the dinner. Beat the whites
of the four eggs to a froth and mix with the
other. Bake this on a buttered dish; a deep
plate will answer, it will rise very light and
brown nicely in a very few minutes. Send
to the table hot. If you please you may sift
powdered sugar over it before sending it to
the table.

RAISIN CAKE.—A delicious and inexpen-
sive cake is made of two eggs, one cup
and a half of sugar, two-thirds of a cup of
butter, one cup of sweet milk, two cups and
a half of flour, three tablepoonfuls of baking
powder or two tablepoonfuls of cream of tar-
tar and one of soda; one cup of raisins,
cloves and cinnamon to suit your taste, one
cup of stoned and chopped raisins. It is the
experience of most cooks that cake made
with cream of tartar and soda will keep moist
longer than that made with baking powder,
but the powder is so convenient to use that
it has almost superseded the other. Do not
frost this cake, but bake until the top is a
dark brown.

A GREAT INSTITUTION.

The surgeons of the International Throat
and Lung Institute, operating from their
different offices, *Montreal, Toronto, Detroit,
Mich. and Winnipeg, Man.*, are treating
more patients suffering from Consumption,
Bronchitis, Laryngitis, Pharyngitis, Asthma,
Catarrh, Catarrhal Deafness, than any other
institution in the world. We will treat no
case we think incurable. We will help every
case and cure the majority we undertake to
treat if patients will strictly follow our direc-
tions. By the use of cold inhalations con-
veyed to the diseased parts by the *Spirome-
ter*, the wonderful invention of Dr. M. Sou-
vielle, of Paris, ex-aido surgeon of the French
army, and other proper local and constitu-
tional treatment, we are curing thousands of
cases of the above named diseases every year.
