ALEX. MCGIBBON.

CHAS. J. BAIRD.

SO much has been said in the public prints about the value of Phosphates as fertilizers, and as brain and nerve food to supply the waste of tissues, resulting from mental and physical exertions, that they have become universally recognised as the most important nutritive agents known to science. They are nature's restoratives, whether it be the worn out soil or the constitution run down with wasting, chronic diseases, depending upon indigestion and imperfect assimilation of food, their action being to perfect cell growth and the formation of healthy tissues. Dr. Wheeler's Compound Exir of Phosphate and Calisaya is not only elegant and reliable, but extraordinary in its effects in energising and vitalizing all the organs of the body.
