

NOTES ON SPECIALTIES.

RHEUMATISM DUE TO GRIP.

In speaking of the treatment of articular rheumatism, Hobart A. Hare, M. D., Professor of Therapeutics in the Jefferson Medical College, and Editor of the *Therapeutic Gazette*, says: "Any substance possessing strong antipyretic power must be of value under such circumstances." He further notes that the analgesic power of the coal-tar products "must exert a powerful influence for good." The lowering of the fever, no doubt quiets the system and removes the delirium which accompanies the hyperpyrexia, while freedom from pain saves an immense amount of wear, and places the patient in a better condition for recovery. The researches of Guttman show conclusively that these products possess a direct anti-rheumatic influence, and among those remedies, antikamnia stands pre-eminent as an analgesic and antipyretic. Hare, in the latest edition of his *Practical Therapeutics* says: "Salol renders the intestinal canal antiseptic." This is much needed in the treatment of rheumatism. In

short, the value of salol in rheumatic conditions is so well understood and appreciated that further comment is unnecessary. The statements of Professors Hare and Guttman are so well known and to the point and have been verified so often, that we are not surprised that the wide-awake manufacturers placed "Antikamnia and Salol Tablets" on the market. Each of these tablets contains two and one-half grains of antikamnia and two and one-half grains of salol. The proper proportion of the ingredients is evidenced by the popularity of the tablets in all rheumatic conditions, and particularly in that condition of muscular soreness which accompanies and follows the grip.

POST HÆMORRHAGIC ANEMIA.

The anemia which follows the hæmorrhages of trauma, gastric or intestinal ulcers, severe epistaxis, child birth, profuse menstruation or hæmorrhoids presents a clinical picture that is so well-known that it requires no description.

Treatment of Rheumatism*

Iron Treatment.—*** "Form which I have found most useful is the soft Blaud. Mass, with Arsenic, made by Duncan, Flockhart & Co."—J. T. Fotheringham, M.D., Toronto.

* Contribution to "Symposium on Rheumatism," read before Toronto Clinical Society.

Capsule No. 104.

Formula

Blaud Mass - - - 5 gr.
Arsenical Solution, 2 minims
(= Arsenious Acid 1/50 gr.)

Capsule No. 105.

Formula

Blaud Mass - - - 10 gr.
Arsenical Solution, 2 minims
(= Arsenious Acid 1/50 gr.)

"Chemical examination shows Iron is in the ferrous condition, and, therefore, that Capsules retain full efficacy."—*British Medical Journal*.

May be ordered through all Retail Druggists.

Samples sent physicians on application.

Full list of D. F. & Co. Capsules will be sent on request.
