

You can play with the utmost precision and the greatest delicacy of expression when you have an ANGELUS BRIMSMEAD, a BELL AUTONOLA, or GERHARD-HEINTZMAN PLAYER PIANO. No matter how good a player you are, you can play better, not to say easier, with one of these marvellous instruments. The leading piano players of the world endorse them and say they're indispensable. To one who has not the opportunity of cultivating music they're a positive boon. If you are interested, we want to give you full information. Send us your name and address.

ists. An important objection is that some of the worst types of bacteria are not killed by pasteurization temperatures, and these grow more rapidly in pasteurized than in raw milk, because the "sour-milk" organisms, which would be antagonistic to them and hold them in check, have been largely destroyed by the heat. Thus it is possible for objectionable and even dangerous changes to take place in pasteurized milk without being apparent.—*Farmers Bulletin* No. 42, United States Department of Agriculture.

"No diarrhoea, however slight, in infants during the summer heat should be lightly regarded and still

less be considered as even salutary. A castor-oil purge and the withholding of all food for a few hours will promptly cure most of such simple cases and prove a safeguard against the acute disease. The few simple measures mentioned will, I believe, if carried out in summer weather, lead to a large reduction in the number of cases and their attending mortality."

—Dr. J. A. Couetts in *The Lancet*.
