The Church.

correctly discussing theories of political economy. A reading people will also be a thinking people. Habits of reflection are generally fa-la to the cause of error, and the Press, by creating a taste for read-ing and abundantly supplying the means for its gradification, produces the important lateral result of exciting the mind to think. Matchler are a powerful advocate, and Atlantic in its moral strength, the Press possesses inexhaustible resources for the triumphant promulgation of correct principles. It is four centuries struce Printing was invented, and what glorious triumphs have since been achieved! The discovery of the humble German artizan has effected the world's intellectual re-meration. The ignorance and moral darkness of the middle ages now stand in shadowing contrast with the meental illumination of the intertenth century. Commerce now circles the globe with her snow wings and the glinit arm of steam, instead of her timid flights in for-and has showered along her pathway the blessings of agriculture, the advantages of science, and the benefits of manufactures and the me-chanical arts. Books have been multiplied from units into millions since the invention of the typographic art, and placed within the postrophile? What imposing figures of rhetoric shall I summor to my assistance when I allude to that climax of wonders, the invention of the magnetic telegraph 1. The most extravagant creations of the and magnetic telegraph 1. The most extravagant creations of the investion is the arabina wights are excelled by a sublime reality, by

our limits prevent our giving more than those which we onsider pe printing profession.

Press as one of the worst of evils. Let it not be forgotton "either, that when the Corsican usurper assembled his vast forces at Bulogne, with the intention of invading the British Isles, the project was hailed with delight by a portion of the British press!! He looked upon the bay-onets of the British army as being, to a great extent, the Ruardians of the soil and the protectors of the people. They had a right to follow army the source of the Monument. onets of the British army as being, to a great extent, the Buardians of the soil and the protectors of the people. They had a right to feel proud of that army. It had upon the plains of Vittoria or Flanders, or beneath the urning skies of India,

"Where deep woods shield the vanquished Sikh,"

er (to use the language of f a modern

It appears that at a meeting of the Building Committee held at Kingston, on 15th November, 1842, it was resolved to erect an obelisk not less in height than 150 feet, of which the cost should not exceed £5000.

By allowing the fund to accumulate at, interest the Building Committee has now at length sufficient means, but not more than sufficient for carrying out their design; and as the object is to erect a Monument which, it is hoped, will endure for ages, and which shall be worthy of This Society disposed of five shares of their funds on the lamented here whose services it is intended to com-memorate, your Committee feels no regret that it was not share of £50.

undertaken before adequate means had been secured. Your Committee do not know whether the resolution to erect an obelisk may be considered by the subscribers to the fund as a final vote not to be departed from : bnt trusting that it may be regarded as being still within the con-trol of those who take an interest in the work, they venpostrophise? What imposing figures of rhetoric such that invention my assistance when I allude to that climax of wonders, the invention of the magnetic telegraph I. The most extravagant creations of faction of the magnetic telegraph I. The most extravagant creations of faction of the magnetic telegraph I. The most extravagant creations of faction which intelligence can be communicated at the rate of 288.000 miles in a second, and which would perform the circuit of this sphere 700 which intelligence can be communicated at the rate of 288.000 miles in a second, and which would perform the circuit of this sphere 700 which intelligence that the and the emotions of astonfshment which are it wakened by the contemplation of striking facts, we can exultingly remember that it was Fraukhin who made the great discovery in electricity. means imposing in its appearance, while in other respects it would not be so well suited to the beautiful site which it is to occupy as a monument of another character would

We would, therefore recommend that a special meeting of the Bailding Committee be called, for the purpose of considering whether the resolution referred to shall be carried into effect, or whether another design shall be

There are now in Canada many architects of taste and experience, and we are disposed to think that if proper means were taken a much better design may be procured than that which the Building Committee approved of.

A difficulty, however, we regret to say, is thrown in the way of any immediate proceeding, by the circumstance that the funds are almost wholly invested in Upper Cana-da Bank Stock, which cannot be sold at present without

Esquire, and seconded by the Chief Justice, "That the Sarah :--

This resolution was unanimously passed; and acting under its authority, the Treasurer, Mr. Ridout, whose services gratuitously rendered to the subscribers have been most valuable, purchased Bank-stock of the Upper Canada Bank, at various times between 1st Nover 1842, and 11th January, 1848, to the amout in all of £4700, which is now held by him as Treasnrer of the fund. His object, no doubt, in exchanging the debentures which had Lady Elgin and the Fair of Canada. Mr. Nunan re-sponded in a very original and pleasing manner. Song Mr. Shanklin — "The low-back'd car." Mr. Shanklin —"The low-back'd car." Supposed would be more readily convertible, and which *Our Guests.* The Rev. R. J. MacGeorge, editor of was yielding rather a better rate of interest. The invest-

RECIPROCITY .- There seems to be no doubt entertained at Washington that the reciprocity scheme will receive the sanction of the American Legislature before the close of the present session. The committee on Commerce has reported in favour of it.

The editor of the New Orleans Picayune partook of starwberries and cream on the 29th of December. The berries were grown in open air.

THE LATE CALAMITY IN NEW YORK,-The investigations of the authorities have shewn a destruction of not less than 70 lives, and many persons severely wounded. The Coronor's jury decided that the boiler was faulty, and have presented the owners and manufacturers, as directly to blame for the calamity.

Detroit, February 16th, 1850. The boiler in the steam-foundry of Messrs. Brown & Mathers, exploded on Thursday morning, blowing the building to atoms and burying beneath its ruins several persons. The boiler was four feet in diameter and sixty feet in length. The scene around the disaster it said to have been truly appalling. A number were badly injured, but no one instantly killed; although it is thought some of them will die. Alanson Beats was the first person recovered-he is said to be very severely hurt; another, whose name we could not learn, was terribly mangled, and almost lifeless; Charles Brown, one of the proprietors, was in the building at the time of the explosion, and is very severely injured; Daniel Mathers, another of the proprietors, was standing near the boiler, but fortunately escaped with slight injury; John Nyman, was operating at the engine at the time, he also fortunately escaped without serious injury; these are the principal sufferers, at least we have not heard of any others.

INDIAN COUNCIL-The Syracuse Journal says that a series of Indian councils have been held daily at the series of Indian councils have been held daily at the Onondago Castle, for the past fortnight. The writer says "on Friday last was celebrated the important rite of sa-crificing the *White Dog!* The customary victim was im-molated on a flaming altar, with all the formality and circumstances of ancient usage among the Iroquois, in presence of a pagin portion of the nation, and numerous white persons spectators. On Tuesday last this crowning festival of the Indian year, after a continuance of nine days was closed with the exciting cremony of the *War Dance*. These observances are continued in the midst of a Chris-tian community with all the reverence, solemnity and zeal tian community with all the reverence, solemnity and zeal of ancient times, with a punctuality and devotion which the Treasurer, under the sanction of an unanimous reso-lution of a Committee of the Subscribers; and the ac-

EXTENSIVE FIRE AT ANCASTER .- We sincerely regret to learn that the extensive cloth factory be-longing to James Russell, Esq., in the village of Ancaster, was entirely destroyed by fire on Thursday night, with the rreater portion of its contents. The origin of the fire is not known; but it was probably caused by a spark from tapid was the progress of the flames, that there was rothing saved except about £200 worth of cloth, and £100 worth of machinery. The building and contents were valued at £4,500 which was partly covered by insurance, viz:
 £2000 in the Gore Mutual, and £1000 in the "Protection" company. The loss will be severely felt in the neighbourhood. The factory was very complete, and the cloths produced commanded a high price in the market, on account of their superior manufacture.—Ham. S, ectator.
 Caleb Hopkins, Esq., has come forward a Candidate for the rest.

Mr. Hopkins, long represented the County " faithfully am honestly; and although he was defeated some time ago, b the extraordinary influences brought to bear against him Before concluding, we may mention that in the note conveying the Rev. Dr. Ryerson's apology for his absence at the meeting, was inclosed the handsome donation of *four dollars* to the funds of the Society, for which the members intend to express their thankfulness at an early

The Dundas Warder, of Friday, contain Report of the Committee of the Subscribers to the Brock Monument Fund. The Committee of subscribers to the Brock Monu-ment fund, appointed at a Meeting held at Toronto on 1st November last, and to whom the report of the Treasurer on the state of the fund was referred, with a request that they would report upon the propriety of commencing the

ited on Thursday last, appears to have been very general throughout the Province. The Hamilton Spectator says that in the neighbourhood of Hamilton, the average depth on the ground was about 18 inches.

At Mr J. Forsyth's Farm, between Ham ilton and Dundas, on Wednesday last, five men and two boys sawed, with a circular saw, fitted in a machine for the purpose, fifty-eight cords of hardwood! The work was performed at a cost of £2 10s .- Ham. Journal.

Newcastle District.

 Bit Strict.
 PLASTER.—We were shown this morning a specimen of the Plaster ground at the Nova Scotia Plaster Mills, in Cobourg, and a better article we think cannot be produced. We would advise our agricultural friends to make an early application, as we are informed there is but a very limited supply of it on hand at present. To our farmers we need not enlarge on the advantage gained by the use of Plaster as they have all tried it and are fully
 £5113 2 7 by the use of Plaster as they have all tried it and are fully alive to its value. The Plaster is perfectly fresh.—Star. We understand from the Port Hope Watchman, that J. M. Andrews, Esq., of Port Hope, has char-tered the Cobourg Harbour for one year from the Govern-

AFFECTING INCIDENT.-Yesterday morning we wit-nessed a scene that we little believed could be enacted within the borders of Kentucky. The steamer G. W. Kendall was lying at the wharf at the foot of Wall-street, preparing to start for New Orleans. On the forecastle deck stood a group consisting of a master and five or six slaves, including a woman with a child at the breast, who were apparently going to the South. Just as the last bell of the steamer rang out its peal for departure, and the lines were about to be cast loose, the mother was told to give up her infant, and that she must go without it. At this intimation the poor creature become frantic with grief. She caressed it a moment, then flew to her trunk, in which had been packed various little articles of clothing that she had made up for it to wear. These she first press d fervently to her lips, and then bestowed them upon her child. Her owner then ordered her to follow him, and she melancholically started to obey, but the prompt ings of nature were too strong within her swelling breast to be resisted, and with loud sobs of grief she turned, embraced her child, and clung to it with the tenacity of despair. The heart-rending grief of the woman, and her frantic gestures, attracted the attention of persons passing along the levee, and strongly excited the sympathies of many. The owner was asked by a gentleman if he would sell the woman and child. To this he asseuted, and de self the woman and child. To this he asseuted, and de-manded \$650 for them. Upon inquiry, however, it was ascertained that the woman was to be sold down the river, and the child would be disposed of here. The bystanders volunteered to raise subscriptions to buy the child, and send it to its mother; and several of them proffered \$10 a piece. At this juncture Captain Norton, the captain of the hermonic model and the data woman of the chemical sectors. the boat, came forward and told the owner of the slaves that he would not, take him on his boat, and sent the whole party ashore ; and in a few moments the steamer was seen dashing over the falls without them .- Louisville Courier, Jan. 25th.

A WORD TO THE AFFLICTED.

There can be no question that there are yet many un-discovered benefits to be derived from the use of Magnetic Embrocation. It rests with the candid inquirer and patient investigator to discover them. To those especially who are the victims of some malady, in which Physic and Physicians have thus far failed, it offers strong assurance
