## Man's Place in the Universe By Alfred Russel Wallace

An important contribution to the philosophy of man's relation to the world he lives in. It is said to be nothing less than epoch-making. It aims to prove that earthly man is the only living and thinking being in the whole universe, giving a startling hypothesis that promises absolutely to revolutionize modern methods of thought on the question of man's place and destiny. Mr. Wallace's contributions to the world of philosophic speculation have been varied and forceful, and he needs no introduction to the thinking people as the co-discoverer with Darwin of the law of natural selection. His deep knowledge acquired during a life of wide experience and study, and his logic ripened by mature years, gives this, his most important book, special interest and authority. Cloth, **\$2.50** net.

## The Moth Book By Dr. W. J. Holland

Here is the book on moths for all time, on which Dr. Holland has been at work for many years. It not only enables a beginner to identify 1,500 North American species, but covers their economic importance, silk culture, the literary side of the subject, and so on. The moths are far more interesting and beautiful than the butterflies, and the magnificent plates illustrating the work are a museum in themselves. With 48 extraordinary color plates and 300 text cuts. Price, net **\$4.00**.

## Rebecca of Sunnybrook Farm By Kate Douglas Wiggin
