Carl G. Saunders	CEO
Sandra Voogt	Marketing/Communications Manager

Vorum Research Corporation is a privately held corporation based in Vancouver, B.C. Vorum was founded in early 1989 in order to participate in a joint development effort with LIC Orthopaedics of Sweden. The mandate of this initiative was to develop CANFIT-PLUS, a "second generation" CAD/CAM software system, with the flexibility to design numerous prosthetic and orthopaedic appliances. Vorum Research Corporation has established distribution channels in Canada, the United States and Europe to market and sell its software products. Vorum is currently seeking new contract software development opportunities in 3-D shape manipulation for medical and industrial application.
