

The School of Physical Education is training its teachers in these broad principles rather than teaching them to be expert performers, athletes or acrobats.

The Gymnasium is the only centre in which a great many of the activities can be properly conducted and its use in the University should be primarily for this purpose.

B PRESENT SITUATION

1. With the limited accommodation at present available required work is now being conducted for students of the first two years, but the requirements of Corporation call for work for the first three years. Lack of accommodation is the only reason why it is not at present being applied for students of the third year. In addition, the Department has been exceedingly liberal in the matter of giving credits for the elective phase of the work, from which, in many instances, students are not deriving as much benefit as they should if the programme were being conducted in a more efficient manner.
2. Seven(7) different buildings are being used at the present time for indoor practical activities. For the various practical activities in the School of Physical Education, R. V. C. and the men undergraduates, 133 hours per week are at present being used.

Molson Hall	70 hours
Royal Victoria College	37 hours
5 other buildings	<u>26</u> hours
Total	133 hours

In addition to the above the R.V.C. and Molson Hall are used for medical consultations for the women and men students respectively.

3. The School of Physical Education has, this Session, a record enrollment of 23 full time students in the first year, and 5 full time students in the second year, there being more than twice as many first year students as any previous session. The demand for graduates is greater than the School can supply. It is the only School of its kind in Canada and is almost certain to maintain its present standing or even continue to grow. As the length of the School course is extended there must be a still further interlocking of the schedule with the academic work of the first and second years in such subjects as English, Physics, Chemistry, Psychology, etc. If ~~a~~ separate Department or Faculty of Education is established in the future to take care of such departments+phases of education as the School for Graduate Nurses, Department of Religious Education School of Social Service and Education proper, it seems that the logical place for the School of Physical Education should be in this newly formed Department or Faculty provided that sufficient opportunity is given for the special subjects and practical work that must necessarily be on the Time Table. In such a school there must be a judicious alternating of practical and theoretical work which can only occur if the building in which the practical work is to be conducted is in close proximity to the academic buildings.
4. The present programme is only made possible by the fact that a one hour period in the academic schedule can be used for practical work. A student at the present time can leave any of the buildings on the lower Campus, take his period in the gymnasium, and return for a lecture at a succeeding hour.
