Council to Provide at Once for the Children of

London. The city council spent some fruitless minutes last evening trying to discover what the contract of Chipman & Power, engineers for the storm sewer system, really means. At the recent meeting of the board of control, Willis Chipman of the board of control, Willis Chipman informed the board that when the contract for the sewage disposal works was completed, he was through. The aldermen were not certain as to whether he meant the contract for the sewage plant, or the storm sewers. There was a unanimous desire to end the services of the engineers, but it was not clear just how this can be done. The firm will be asked to state when their contract ceases. Some of the aldermen fear that Chipman & Power will be able to collect a fee on all storm sewer work in the future. The assessment department came in for some discussion last evening. The opinion of the city solicitor was read in the effect that neither Assessment Commissioner Grant, or any assessor had any right to make any exemptions on income assessments other than income assessments other those provided by statute, and that it was also not necessary to have any declaration in connection with assess-ments. However, the council passed a

BESIDE G. T. R. TRACKS Brakeman Ward McAuliffe, of 15
York street, was unconscious for many hours at his home last evening as a result of falling and striking his head against a rall in the Grand Trunk yards in East London. He was found lying senseless beside the tracks about 5:30 by some railwaymen. It was thought at first that a big lump of coal had fallen from a passing train and struck him, but Dr. Clegs, who was called, could find no bruises to indicate an accident of this kind. It is expected that McAuliffe will recover.
