Sitting in Toronto, Justice Riddell has reversed the finding of the boards in two instances, and has placed the men concerned in categories lower than A. Before the decision was given it was suggested that the members of the medical boards appear and give evidence as to their find-people in Canada and though he has no intention of enter-people in Canada and though he has no intention of enter-proposed a car like a fine chance when "the day" arrives. There is wisdom in his decision, whether or not it is strictly law. No one will doubt that the family physician, who has attended a man, it may be, for many years, is more likely to know the details of his condition than are the members of a military board, strangers to the case, who base their judgment on a more or less cursory examination. VOICE OF THE PEOPLE

THE WRONG DATE.
To the Editor of the Advertiser:
Your Saturday issue, on the strength of a statement credited to a St. Marys paper, suggests that as this year is the centennial of London, something should be done to mark the occasion. The writer has confused London with London Township. Our city was surveyed so far as the first survey is concerned in 1826 by Col. Burwell, and the first house was built that year on King street, near the corner of Ridout. In 1818 there was no house on the site of London—the nearest being two or three miles away.

ONE CITIZEN'S EXPERIENCE.

Now, this man, Mr. George Sullman, has never opened his mouth about the farmers' interest, and I do not believe that he has ever brought a measure into the House for anything, and if he did, it is not worth mentioning. I think he has a school-hook agency that would be not conservatives and Liberals, who would make good men, and as for Chatham, it is the farmers that keep Chatham going, and anything would be better for them than what they have at present. It would be a good idea for the Liberals to form a new platform, at least, to get in a few new planks in the old platform, such as amending the drainage acts, school acts and assessment acts, which certainly do need amending to help the city people.

The drainage in Kent and Essex is one of the greatest problems the former has to contend with and to were that would help him a little, and the did, it is not worth mentioning. # A SLUGGISH LIVER CAUSES LOTS OF TROUBLE

While the presses of morning papers in cities outside Western Untario are whirling to print their papers,

# THE ADVERTISER FORMS -ARE STILL OPEN

waiting to receive the latest news. And that is what counts in the newspaper business—to get the latest news to the people first.

London is the centre of Western Ontario. The Advertiser is published in the hub of this great district, from which radiate railways that carry newspapers, and carry them quicker than from any other city.

The morning newspapers of Toronto have to "close early" in order to catch their special train into Western Ontario. The "news night" may not be half over when the order is given for "no more copy." The Flying Post will not wait beyond a certain hour. The "closing up" and printing of a newspaper must consume at

least a full hour. While all this mad rush to get into the London field is in progress, The Advertiser is still receiving over its wires the news of the world, the dominion and the province. The linotype machines are still clicking, the editors are writing headings, preparing copy, as the "copy boy" takes it hot from the telegraph operators. The operators receive thousands of words from the great centres long after the morning papers of other cities have reached the "dead line" and cried the "jig is up," which means in newspaper parlance that the "news night" is over for a certain edition. The Advertiser receives and prints news from everywhere for Western Ontario a full hour after the Toronto papers

have gone to press. Close service is what counts. An Advertiser reader knows that he will receive all late news in The Advertiser—all the news up to the time the wires close. In several notable instances, the most tremendous news of the world has come to The Advertiser after other papers have

been closed up and sent to their readers.

The Advertiser, with its three editions daily, is printed in the interests of London and Western Ontario. No claim to monopoly is made. But Advertiser service, with its TWENTY. FOUR-HOUR WIDE-AWAKE-NESS, cannot be excelled in its field by any newspaper. The paper is full of special features which no other paper has secured or can secure. These features "prove up" by test, prove up for readers and for advertisers. Thousands of letters come to the office yearly direct from feaders. And a circulation increase, which has not been exceeded anywhere, is the best proof of all.

THE ADVERTISER HAS THE LARGEST CIRCULATION OF ANY NEWSPAPER IN ONTARIO OUTSIDE THE CITY OF TORONTO.

If Toronto newspapers had circulation in the same proportion as The Advertiser according to population, they would run more than 350,000 copies per day. The largests circulation in Toronto is below 100,000 copies.

> Western Ontario is for The Advertiser and The Advertiser is for Western Ontario.
