MOTOR RUNS DOWN TRACK WORKER

Touring Car Afterward Takes Prime Minister and Sir Wil- Students and Business Men Injured Man, Who Is Very Seriously Hurt, to Hospital.

The tearing up of the car tracks on East King street, near Parliament street, was indirectly responsible for a rather serious motor car accident at about three o'clock Saturday afternoon. Stephen DeBlack, of 41 Castle avenue, of the men engaged on the work one of the men engaged on the work of relaying tracks, in stepping back to avoid a street car walked directly in front of a big touring car. He was knocked down by the motor car and Living expenses so they say are and Living expenses. when picked up was so badly injured that his instant removal to St. of all compare with former times.

At the hospital was necessary.

At the hospital his condition was considered so serious that he was placed under X-rays to determine the extent of his injuries. These are chiefly about the head and it is possible has sustained a fracture of the skull. The injured man, who is 56 years of age, suffered greatly from shock.

In the car, at the time of the accident was Mrs. O'Tisse, 646 Hairon street, the owner, her two children and a nurse and Jas. Wellesley, the chauffeur, who was driving.

According to eye-witnesses the driver of the car was not wholly responsible for the accident. De Black street car to pass and had his back to the motor. Wellesley, the driver of the car, blew a shrick whistle which was on the car, as he saw the man step in front of him, but De Black evidently did not hear him and was struck. The man was rushed to the hospital.

The Untario and Quebec members are also complaining of the strain, especially of the naval bitl and of committee work and of being out of pocket as well as of the loss of six months time. The loss in income to business and professional men is, however, the cause of most complaint. Some representation of this condition of affairs is to be made to the premier and to sir Wilfrid Laurier, and the former may be asked to increase the indemnity. One novel suggestion that has met with some support is to cut down the representation to 150 members, to reduce the cabinet ministers in number, and had his back to the motor. Wellesley, the driver of the car, blew a shrick whiche was on the car, as he saw the man step in front of him, but De Black evidently did not hear him and was struck. The man was rushed to the hospital in Mrs. Tisee's car. She accompanied him to the hospital.

Hotel for the last three weeks. When young Charles was taken to the roof by his nurse he saw the gardeners planting seeds in the long flower boxes. It was the first time he had ever seen anything planted, and he was greatly interested when told the seeds would soon come up as flowers. Seeing his mother's pearls he thought they were seeds and planted them, hoping they would blossom into flowers.

The meeting closed with dignity and seriousness, and with the expression of the idea that the granting of naturalization rights to the Japanese in America would be a practical solution.
