Pride (to use the emphatical words of a sacred writer) was not made for man.

The following was a favourite sentiment of the wise and good Socrates; "We should eat and drink, in order to live: instead of living, as many do, to eat and drink."

Behold, how rich and beautiful are the works of nature! What a bountiful provision is made for our wants and pleasures! Surely, the author of so many blessings is worthy of our love and gratitude!
