Here is something that the Philadelphia Record gives to the protectionists to pender over: "Although the duty on the foreign steel used in building the new Boston court house was just 100 per cent. of the cost of importation, the price of the same product of American manufacture was still higher than the doubled figure. The Belgian manufacturer was satisfied with getting 1½ cents a pound for his steel, while the American steelmaker selling his product for 2½ cents, did not consider it worth while to make the concession necessary to prevent the the concession necessary to prevent the orders from going abroad. Double prices for steel, of course, means double disadvantages to the people who are compelled to submit to such exactions."

He was kept at the hospital, and it was thought he might have suffered internal injuries. A horrible tale of baby murder in connexion with a foundling hospital, comes from Montreal, as told by the Witness. Of 200 babies given out to one baby farmer, 198 died. Two only of the 200 lived 18 months. One nurse stated that she took a dead child to the institution avery day during the summer months for she took a dead child to the institution every day during the summer months for three years.
