An alligator is rather smart about som things. He knows as much about strathings. He knows as much about strategy as a major general or militia. He will poise himself on a log, open his mouth wide by elevating his upper jaw, and remain perfectly quiot. In a short time his mouth will fill with mosquitoes and files, when down will come his jaw, taking every mosquito and fly prisoner. He swallows them, licks his chops, and elevates his jaw to catch another floor full. This dish is regarded by the alligator as the most delicious that the country affords.

works published a few years ago, the publishers had a figure of a hog in gilt: It was always disagreeable to associate so great a man with so filthy an animal, and we are glad to know from Lippincott's Magazine that the name is not taken from that animal: "The origin of the name of Bacon is thus explained by Richard Verstegan, famous for Saxon lore and historical research: Bacon, that is, of the 'beechen tree,' anciently called bucon; and whereas swines' flesh is now called by the name of bacon, it grew only at the first unto such as were fatted with bucon or beechmast. It is, as a writer in 'Notes and Queries' points out, a curious authentication of this derivation that Collins, in his 'Baronet', age,' mentions that the first man of the name of Bacon of whom there is record in the Herald's College bore for his arms works published a few years ago, the
