

THE PARENT'S LEGACY.

How many thousands of children are now suffering with some inherited malady, received as an heir-loom or legacy from their parent's infirmities! How many thousands of conscientious parents, who suffer mental torments as they witness the locked-up diseases and the prevalent infirmities of their own bodies, gradually becoming developed in their children! SCROFULA, KING'S EVIL, St. Vitus' Dance, Fits, RHEUMATISM, RICKETS, *Strumous Discharges from the Ear*, Eruptive Diseases of the Head, Nose, Cankers, Sores in the Mouth, Dropsical Swellings, Water of the Brain, White Swelling, *Early Rotting of Teeth*, Early Ripeness of Intellect, great precocity; also subject to be laid up on the least exposure—these are but few of the many symptoms that the unfortunate child exhibits.

It is better in all cases, where you know or suspect that your child inherits a disease, to commence early and give the Sarsaparillian Resolvent in doses as prescribed for infants and young children. The longer the poison remains in the blood, working the organs and structure of the body out of the poisoned blood, the more difficult the cure.

A CHILD SICK FROM ITS BIRTH CURED WITH ONE BOTTLE OF RADWAY'S RESOLVENT.

—RUSSELL, ONT., CANADA, Sept. 28, 1868.

DR. RADWAY—*Dear Sir*:—I herewith send you a voluntary statement regarding the case of my son. He will be, if he lives until November next, five years of age. From his birth he has been a sickly, and in every way delicate child. When a year and a half of age he had an attack of the measles, and since then he has suffered from a cutaneous eruption of a very severe type. His face, hands, arms, and head were completely enveloped with disagreeable sores, and with sores in the head which at times destroyed his hearing, and caused us to despair of his life. The sores or eruptions first appeared in bright red spots like burns, and then, after a time, blistered and became running sores. I tried several physicians of high repute, and numerous proprietary and other preparations highly recommended for cutaneous diseases, but the little sufferer continued to grow worse.

I was induced to try your SARSAPARILLIAN RESOLVENT, but without the slightest hope of benefit to my child, but to my surprise he speedily recovered under its use. I first commenced administering it in very small doses, half a teaspoonful three times a day, and after using one bottle, to my surprise and pleasure, he was perfectly cured.

I cheerfully recommend it to others afflicted with disease of a similar nature, knowing its efficiency by actual observation.

Your humble servant,

(Signed)

NATH. HELMER, Dept. Postmaster.

Closely resembling the SCROFULOUS taint is that of SYPHILIS and MERCURY. These destructive agents, unless eradicated, will fasten themselves on the tissues and in the very bones of the system.

This last fact is now undisputed, as Chemists have demonstrated that deposits of this mineral Mercury are found in the bones of persons who have died after having been subjected to COURSES of Mercury, and we assert that the mischief of this agent, so popular with many physicians, is beyond all calculation. THOUSANDS have had their systems ruined by its use, and now that it is beginning to be found out what we have ever asserted, that Mercury will not cure a system affected with Syphilis or *private* disease, the thought becomes appalling. We say to you, whose systems have become broken down by either Scrofula or Syphilis, never allow yourself to take Mercury or Calomel. To the poison that is lurking in your system it adds another as bad if not worse than that it attempts to cure. Witness the broken down miner for Quicksilver: Sores, Rheumatic pains, Brain and Liver troubles beset him the balance of the poor life he drags out. Would you inoculate him with Syphilis to cure his mercurial disease? The doctrine that you must
