

KEEP IT HANDY

You can never tell when a horse is going to develop a Curb, Splint, Spavin, Ringbone or a lameness. Yet it is bound to happen sooner or later. And you can't afford to keep him in the barn. Keep a bottle of

Kendall's Spavin Cure

handy at all times. Mr. Briem, of Icelandic River, Man., writes: "I have been using Kendall's Spavin Cure and find it safe and sure."

Get Kendall's Spavin Cure at any druggist's. \$1. per bottle—6 bottles for \$5. "Treatise on the Horse"—free—or write to

and also had a little extra time. However, he has decided to raise tame hay, and so he puts a little extra work on 15 acres of the summer fallow, expecting to sow alfalfa on it in the spring. Before this year the soil has not been in the proper condition to make the growing of alfalfa successful. The remaining 45 acres of fallow was sown to fall wheat early in August.

Then the harvest is soon ready, the wheat filled being very good this year and right gladly the farmer starts harvesting. Again this year he hires a man to help for \$2 per day.

Soon after the wheat harvest the barley and oats are cut and carefully stooked. Then fire guards are plowed around the fields as a protection and the graneries are put into shape to receive the grain.

Threshing then is the next important work; and it leaves the graneries well filled and the farmer is in good spirits.

The crop this year was:

Fall wheat, 75 acres	yielding 32 bus.	3400 bus.
Spring wheat 65 acres	yielding 21 bus.	1365 bus.
Oats, 50 acres yielding	58 bus.	2900 bus.
Barley, 10 acres yield	ing 24 bus.	240 bus.

Total 7905 bus.

The cash outlay for harvest was:

Threshing	\$490.55
Twine, \$2 per acre, at	
9 cents per lb.	36.00
Help	40.00

Total \$566.55

As the price of grain is not very good, he starts plowing and by the time the ground freezes he has the 75 acres of fall wheat stubble plowed, packed and harrowed. Now that the farmer has a sub-surface packer, he packs all his plow and follows it soon with the harrow.

The temporary fence which was erected around the fall wheat the fall before had been taken up during the summer and he now places it around this fall's wheat field to keep the stock out when they are turned onto the stubble fields. In a few years, when a complete system of crop rotation has been worked out, the fields will all be substantially fenced, but this is not practical as yet.

During the winter he sells his wheat, 4,500 bushels for 80 cents per bushel, totalling \$3,600. Besides this, he will have 1,500 bushels of oats to market in the spring. By marketing the grain in the winter it more nearly equalizes the labor throughout the year and the field work in the summer does not have to be neglected in order to do the hauling.

As the time we were going to watch this farmer's operations has expired, it would be well to see how he is situated financially, as compared with the time when he purchased the farm. The land has increased in value \$8 per

Save Your Chaff. It is Valuable for Feeding Purposes.

YOU CAN DO IT WITH A

Neepawa Wind Stacker

Don't bother with that old windstack and lose half of your season's run. We can supply you promptly with a machine that will do the work and is trouble proof. Rush orders attended to promptly.

The Neepawa Stacker is made to fit any size or make of Separator (either steel or wood). If you change your separator the stacker will fit your new one by getting the fills from usual trifling cost

OUR GUARANTEE

We guarantee the Neepawa Wind Stacker to do better work and to run easier than any other stacker on the market doing the same work, and under the same conditions; to stack the straw on one side of the machine and the chaff on the other, to handle all the straw that can be put through any machine without taking it into the fan, and to not back the shoe current into the separator.

W. A. Henry of Wisconsin College of Agriculture says:

"The chaff of oats and wheat contain more crude protein than does the straw and forms a useful roughage for stock. All such roughage will be widely utilized when a rational system of feeding is followed." "That wheat oat or barley chaff as a food for the repairing of body tissue, for growth, for the laying on of fat, or for the production of external work is worth almost as much as timothy hay."

Make your European trip a "Royal" one

Out on the upper deck where the cool, invigorating ocean breezes blow away the heat of a summer's day; where large roomy chairs in every line and curve tempt the traveler to repose—there in spacious resting places'neath sheltering awnings one can sit in cool comfort and enjoy the picturesque beauty of the St. Lawrence as it passes in panorama before the eye. These are a few of the outdoor pleasures of the

ROYAL GEORGE and ROYAL EDWARD

Inside, the music room has for its motif the period of Louis XV. A charming decorative treatment similar to that of the famous Chateau Rombouillet has been accorded the library, and the Elizabethan smoking room is suggestive of the baronial hall of an English hero of the Armada. The cabins-in-suite with sitting rooms, bedrooms and bathrooms are each distinct in decorative treatment.

Travel the "Royal" way—the shortest route to London.
