Mention The Canadian Thresherman and

well, its tiny siren of the prison in jeering notes of joy and victory.

Fred had supposed that at the last moment the younger convict proposed to leap to the running board, but instead the stranger remained motionless.

Fred shouted impotently after the flying car. In dismay he seized the stranger by the arm.

"But you?" he demanded. "How are you going to get away?"

The stranger turned appealingly to where, upon the upper step, stood Winnie Keep. "I don't want to get away," he said. "I was hoping, maybe, you'd let me stay to dinner."

"Will you kindly tell me," Fred demanded, "who the deuce you are?"

The stranger exclaimed peevishly. "I've been trying to tell you all evening," he protested. "I'm Harry Van Warden!"

Gridley the ancient butler, appeared in the open door.

"Dinner is served, madam, he said.

The stranger gave an exclamation of pleasure. "Halloa, Gridley!" he cried. "Will you please tell Mr. Keep who I am? Tell him if he'll ask me to stay to dinner I won't steal the spoons."

Upon the face of Gridley appeared a smile it never had been the privilege of Fred Keep to behold. The butler beamed upon the stranger fondly, proudly, by the right of long acquaintance-ship, with the affection of an old friend. Still beaming, he bowed to Keep.

"If Mr. Harry—Mr. Van Warden," he said, "is to stay to dinner, might I suggest, sir, he is very partial to the Paul Vibert '84?"

Fred Keep gazed stupidly from the butler to the stranger and then to his wife. She was again radiantly beautiful and smilingly happy.

Gridley coughed tentatively. "Shall I open a bottle sir?" he asked.

Hopelessly Fred tossed his arms heavenward.

"Open a case!" he roared.

At ten o'clock when they were still at the table and reaching a state of such mutual appreciation that soon they would be calling each other by their first names, Gridley appeared with a written message which he had taken from the telephone. It was a long-distance message from Yonkers, sent by James, the faithful chauffeur.

Fred read it aloud.

"I got that party the articles he needed," it read, "and saw him safe on a train to Boston. On the way back I got pinched for speeding the car on the way down. Please send money. I am in a cell at Yonkers."

Increase Your Profits for 1913

The expense of operation and up-keep of an engine makes a large hole in your season's profits. Install a Gould Balance Valve.

"Where you formerly had expense you will have profit."

Result—You increase the capacity of your engine.

Eliminate that wear and tear on valve gear.

Save Fuel, Water and Lubricating Oil.

Send for illustrated catalog and the "EVIDENCE."

Special Cold Water Ejector

For elevating large quantities of water quickly and without raising the temperature, we have designed our No. 77 Ejector, which will elevate 3,600 gallons of water per hour with scarcely any increase in temperature. This Ejector is a necessity for engineers who have been bothered with hot water.

Ask your dealer, or write us for particulars
