## HORSES.

There are signs that the usual summer lull in the horse market has arrived. The offerings this week are somewhat in excess of the demand, and a tendency to somewhat lower prices prevails. ## Prince Edward Island

Owing to the cold, backward spring planting will be a little later than usual, but the farmers are rushing ahead with their work now that the land is in good condition. Since the advent of May we have had a good deal of wet weather, but the grass is flourishing and farmers expect excellent crops of hay. Some wheat was sown on the 10th of May. The Condensed Milk Factory Co. are urging farmers to supply more milk. As an extra inducement they are offering to pay ten cents per 100 lbs. more than they did last summer.

On May 10 Dr. W. B. Pethick, V.S., examined the herd of cattle at the Provincial Farm that had responded to the tuberculin test. No further tests are considered necessary as the animals are certainly affected.

As it is impossible to disinfect the stables, slaughtering seems now to be the only alternative. Recently two of the animals were killed and found to be diseased.

## Special Seed and Weed Meetings

With a view to increasing the supply of good seed, the eradication of weeds, etc., the following series of meetings have been arranged for during June, to be held under the auspices of the Seed Division of the Dominion Department of Agriculture, and the Farmers' Institutes of the Ontario Department of Agriculture.
