There was a sound of reveiry by night. The Bloggses were giving a party.

Mr. Bloggs had just obliged with the touching ballad, "'Tis Love That Makes the World Go Round," and Master Bloggs seized the opportunity to sneak behind a screen with his father's pipe.

Shortly afterwards is was observed that the boy wasn't well. His face was pallid and his eyes stood out.

Cried Mrs. Bloggs:

"Goodness, child, what's the matter? do believe you have been smoking." Willie feebly shook his head.

'Taint that, ma,'' he replied, untruthfully. "If it's true what father's been singing about, I—I—must be in

"Before marriage I used to sit up until midnight wishing he would go home." 'Yes ?'

"Yes, and since we are married I sit up until midnight wishing that he would come home."

#### YOUR WIFE WILL

appreciate it when you bring home a can of SNAP. For cleaning her hands, after filling the lamps, milking the cows, peeling the potatoes and onions, there is nothing to equal

SNAP

It leaves the skin smooth and soft. Order from your dealer to-day. Snap Company, Limited, Montreal,

#### Questions and Answers. Miscellaneous.

Foal Stifled - Skim Milk for Mare. 1. I have a foal about two months old, and I just noticed last week that it is stifled. Its stifle slips out and in at times, and is a little puffed out at the front, about the size of your hand, and is quite soft, as though there might be matter in it, but is not sure, nor is she lame when walking. Sometimes it leans over on its toe. What would be the best thing to do with her?

2. Is skim milk good, to give the mare while the foal is sucking her? C.P. Ans.-1. Repeated blistering of the stifle is the only hope of cure. the colt in a comfortable box stall, allow no exercise more than she takes in the stall, clip the hair off the outside and front of the stifle joints and blister every month with a mixture made of 11 drams each of biniodide of mercury and cantharides, and 2 ounces vaseline. Rub the parts well, and in 24 hours rub again. Have her tied so that she cannot bite the parts. On the third day wash off and apply sweet oil. Let loose now and oil every day until the scale

2. Sweet skim milk could do her no harm, given in reasonable quantity. Many give a little to the colt.

#### Noxious Weeds, Summer Pruning, Tent Caterpillars, White Grubs.

1. Is there a law compelling your neighbors, who do not clean their farms of noxious weeds, to keep them down, as our farm is very carefully looked after regarding growth of weeds?

2. I thought the law provided for a

fine on seedsmen who claim to have Government-tested grass seed, and I seeded down fields which were free of weeds and we got a bad dose of shepherd's purse in last year's seeding, also wild mustard. If one says anything about the weed seeds, their only excuse is, your land is dirty. I wish there were stricter steps taken towards clean seed.

3. Can any subscriber inform me if it is an injury to fruit trees pruned in June? Let me know as soon as possible.

4. What do the caterpillars, which have been cleaning and eating leaves of trees this spring, turn into; or, what becomes of some that are left, and are about two inches in length now, as there were lots of them this year?

5. Has there been, up to the present time, anything found to kill white grubs? They ate an acre of our oats and I resowed it again, and they are eating that also. Now, what can I do to them, or would it be best to let it alone?

Ans.—1. Yes. Revised Statutes of Ontario, 1897, Chapter 279, the Act to Prevent the Spread of Noxious Weeds, and of Diseases Affecting Fruit Trees; solidated Municipal Act, 1903. empowering municipal councils to pass by-laws for preventing the growth of Canada thistle and other weeds detrimental to husbandry, and for compelling the destruction thereof; the Ontario Statute of 1904 (Chapter 27), to amend the law respecting the destruction of noxious weeds; the Ontario Railway Act (1906), 6 Edw. VII., Chap. 30, Sec. 105. See especially Sec. 2 of the Revised Statute above referred to.

2. Seeds sold must come under the Seed Control Act.

3. Many prune in summer to promote bearing.

4. The caterpillar referred to is the tent caterpillar. It builds large webs in the trees in spring. The worm pupates, and turns to a small, dull, yellowish or reddish-brown moth, with two transverse, whitish, or pale-yellowish lines on the fore wings. The moths lay their eggs in early summer, in a single, ring-like cluster around a twig. The eggs remain there about nine months, covered by a protective substance. These eggs hatch in early spring, just before leaves appear. Early-hatched larvæ feed upon the unopened buds till the leaves

5. The most effective means of fighting white grubs is by a short rotation In the United States, good of crops. results have been reported from treating the crop with nitrate of soda. This is a stimulant, and rapidly rushes the growing crop over the period of attack.

# There Is One BEST ROOFING

and that's Galt Steel Shingles -the most satisfactory and economical roof you could put on your building.

Because Galt Steel Shingles will last a lifetime, and will give you fire protection, lightning protection, and weather

protection as well.

Wood shingles warp and curl, crack and rot. Slate is so brittle that a falling brick or stone will crack it and start a leak. Galt Steel Shingles interlock so securely that a leak is practically impossible. They are made of Galvanized steel, and quickly pay for themselves by saving the cost of repairs. Better let us send you full particulars. We have an intensely interesting budget of Roofing Information here awaiting your name and address. Write for it TO-DAY—it's FREE.
