### In the Financial Panic - of 1907 -

While the prices of the leading American securities fell on an average of 56 per cent. and the average depreciation of ten of the leading Montreal securities fell on an average of 28 per cent., the average decline of the leading Nova Scotia securities was but five and a quarter per cent.

Surely this is a very favorable showing for Nova Scotia Securities.

We have prepared a list of securities of this character which we have investigated, they are offered in lots to suit purchasers. At the price at which they are offered an investment in them will yield from \$4\$ to 6¼ per cent.

Ask for circular M-29.

If you request it, we shall be pleased to send you a copy of the Nova Scotia Financial Register.
