

In the first place, running wires are coiled. That means plenty of "give" with weather changes and strains. All wires are galvanized. That means no rust. Running wires are high carbon, hard steel No. 9 that bear 2,000 pounds pressure. Ordinary soft No. 9 wire snap at 1,200 pounds pressure. FROST LOCKS are non-porous Bessemer steel, galvanized or enamelled—rustproof and stronger even than the wire. FROST LOCK LOCKS both running and upright wires—hold them fast without crimping or bending.

Frost Wire Fences

are just as trim and trig after being buried under the snow all winter as they were when put up in the spring.

Write for a copy of our booklet. It tells the details about Frost Fences, and gives illustrations of fences actually in place on Canadian farms. FREE to YOU.

IF YOU ARE GOING TO BUY A

British Columbia Fruit Farm

Remember that Columbia Gardens

is the only irrigated tract of Fruit Land on the market in British Columbia that is reached by railway.

That it is the only irrigated tract convenient to local markets.
That it is the only tract with a super-abundant water supply.
That it is the only proposition where no charge is made for the water.

And Don't Forget that

it is being sold at prices about one-half of what is asked for land, elsewhere, possessing none of these advantages.

WRITE FOR PAMPHLET.

Last Mountain Valley

The heart of the great Saskatchewan Wheat Plains of Western Canada.

Buy Your Tickets to Strassburg
Via Winnipeg by the Soo Line

In this section you can see two Trans-Continental Railways actually building. Write for maps, prices and handsomely illustrated booklet descriptive of this rich region.

Read What Prof. Thos. Shaw Says About this District:

Speaking of Last Mountain Valley, he writes, after personal inspection: "This rich and beautiful farming section lying east of Last Mountain Lake, embraces one of the finest areas, in the Northwest. The land is undulating in this region, mostly open prairie. The soil is a rich, black vegetable loam, from one to two feet deep, and is underlaid with a clay sub-soil. Frost, to injure the wheat is virtually unknown. Being thus favored so highly by nature, it is not surprising that the production of wheat in this region is phenomenally high; in several instances forty to forty-five bushels per acre have been reaped. Oats, Barley, Flax and all small grains yield relatively as good as those of wheat. Potatoes grow most luxuriously. Two or three years ago, there were not more than thirty-five settlers in the entire area, now there are over three thousand and others rapidly coming in."

WILLIAM PEARSON COMPANY, WINNIPEG, CANADA
