TRIBE OF CRIMINALS.

The Maghaya's Greatest Pride is Successful Burglary.

The Maghaya is born in an arhar field and schooled to theft from his infancy, says the Bengal Gazette. He lives without shelter or food for the morrow, perpetually moving from encampment to encampment, chased by the police and execrated by the villagers. His greatest pride is a successful burglary, and a prolonged drinking bout his most coveted reward.

Jail offers no terrors to the Dom; it is merely the result of being a bungler at his trade. The first attempt to reclaim the Maghaya Doms in Champaran was made by Mr. (now Sir E.) Henry. He found the greater number of the adult members of the tribe were in jail. Every police officer was held responsible if any Doms were found in his jurisdiction, with the result that as soon as a Dom was released from jail he was usually returned thither under the bad livelihood sections.

Agricultural settlements were established for the tribe, but they do not seem to have been very successful as civilizing agencies. The settlements serve as houses for the women and children, but the men are seldom found in them. The females generally hawk stolen property in the villages and act as spies.

WEIGHED FOUR POUNDS WHEN FOUR MONTHS OLD

Most of the sickness that comes to babies and young children is due to the stomach or bowels being out of condition. It is then that they are cross, peevish and upset the whole household. These are troubles that Baby's Own Tablets always cure promptly. Here is proof: Mrs. J. Stewart, Everton, Ont., says: "My little girl thrived so badly that at the age of four months she weighed four and a half pounds. Her stomach was badly out of order, and although the doctor treated her he did not help her. Then I got Baby's Own Tablets and right from the first they helped her and now she enjoys perfect health." If your little one is ailing try Baby's Own Tablets—always do good; cannot do harm. Sold by medicine dealers or by mail at 25c a box from the Dr. Williams' Medicine Co., Brockville, Ont.

WHEN THE EARTH QUAKES.

Some idea of the stupendous power of the subterranean forces exerted by earthquakes is shown in the physical changes effected by them. Mountains have been obliterated or new ones formed, islands have been made or destroyed, and whole stretches of coastline wiped out. For instance, in September, 1750, on the lofty tableland about 150 miles south-west of the city of Mexico, a piece of land four square miles in area was suddenly raised 550 feet, and numerous cones appeared—one of them, the volcano of Jorullo, being nearly 1,700 feet high. Java, in 1772, suffered in the opposite way, for a tract of country fifteen miles long by six miles broad was swallowed up entirely—a mountain of 9,000 feet being reduced to 5,000 feet only in the process.
