CONFIDENTIAL REPORTS ON MINES.

Rossland, July 21, 1898.

Dear Sir:

All Rossland stocks are active. The market is more

lively than it has been for two years.

There is nothing remarkable however about existing conditions. Everything combines to prove that Rossland is the greatest Gold-Copper Camp on the face of the earth. This is not boom talk but sober sense and has been acknowledged by some of the greatest living scientists and foremost mining experts. Large capitalists readily admit this but the man of small capital is slow to believe.

Why did the C. P. R. purchase the Trail smelter and C. and W. railway, and why does this gigantic corporation con-

template still larger investments?

Why did ''Jim Hill'' purchase the Corbin system of railways? Why did Sir Charles Ross and associates undertake the gigantic task of conveying electricity from Bonnington Falls

to Rossland?

Why did Charles R. Hosmer and other magnates put thousands of dollars into Rossland mines?

Why did Hon. C. H. Mackintosh put millions of dollars into Rossland instead of into Klondike?

Why does the capital of the world seek investment in Rossland? Ask yourself these questions, friend, and perhaps you too

will ''take a flyer.' As the best investments for men (and women too) of moderate means we recommend: Giant, Monte Christo, Novelty, Good

Hope, Iron Mask and Deer Park. Like real estate inside mining properties are the best. Confine your investments to Rossland stocks-Red Mountain properties preferred.

Others are not as good.

Sincerely Yours,

C. O'BRIEN REDDIN & CO.
