Paris, March 16-(Correspondence) -The continual unheaval of earth in the war of trenches is bringing many hidden treasures to light. A French reservist uncovered a package of francs (25,000), which he promply handed over to his officer. French English and German coins to the value of \$400 were unearthed in a trench near La Bassee by an English soldier. Another found a gold carved necklace of the seventheenth century.
