**Says Registration of Canada's
Man-Power Will Be Complete
By End of June.**

Mr. McCurdy sketched, in some detail, the scope of the registration and the methods by which it will be carried on. The Canada registration board was representative of all interests—of labor, of manufacturers, women workers, agriculture, with the addition of the chairman of the Military Service council.

"The regulations under which the registration of the man and woman power of Canada will be effected have now been approved by order-in-council. The plan of operations which they disclose is very similar to that employed for the purposes of a Dominion election. The electoral constituency will be the territorial unit. In charge

"Upon a day that will be fixed by proclamation, every person of sixteen years of age or over will be requested to attend at one of the places of registration and there answer truthfully a number of simple questions set forth upon a card, such as his name and address, his age, his country of birth, whether he is married or single, how many children he has under sixteen years, his occupation, the kind of work for which he has been fitted by training or experience, etc. Upon completing and signing the card he would be provided with a certificate of registration, which he must always carry upon his person and produce upon demand by any peace officer, police officer, or constable.

"Provision is made for the subsequent registration, at post office, of those who, for any good and sufficient reason, such as sickness, absence from the country, etc., cannot register upon the day appointed. The same facilities will be open to those who, after registration day, attain the age of sixteen or are discharged from active

"Any person failing to register will expose himself to serious penalties and disabilities. He may be fined or imprisoned, or, at the discretion of the court, he may be both fined and sentenced to imprisonment. He will forfeit any right he might otherwise have had to vote at the Dominion election. He will be disentitled to receive any wages or salary, to obtain board or lodging at any hotel, restaurant, or boarding house, or to purchase a ticket for or travel upon any railroad or steamboat. Any employer knowing him to be unregistered who pays him any salary or wages, will thereby expose himself to the same penalties, which the defaulter has incurred thru failure to register. Any person knowing him to be unregistered who gives or who sells him transportation, or any conductor, captain, purser or other officer who knowing him to be unregistered, permits him to proceed on a journey, will thereby render himself, liable to heavy penalties."

Mrs. Ernest E. Adkins, Brotton, Sask. writes:—"I have

Mrs. Ernest E. Adkins, Brooklyn, Sask., writes:—"I have used Baby's Own Tablets with great success for four years and always keep a box on hand. Thousands of other mothers say the same thing—once they have used the Tablets for their little ones they will use nothing else. Experience shows them that the Tablets are the ideal medicine. They are a mild laxative, thorough in action and never fail to relieve the minor ailments of little ones. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

(Experimental Farms Note).

Unless many kinds of both useful and ornamental plants are protected from injurious insects and fungous diseases by spraying, the loss in fruit and vegetable crops may be very great, and, in the case of ornamental plants which would otherwise have attractive foliage and bloom, they may be rendered very unsightly.

The spraying of fruit trees should be begun just after the buds have broken in the spring and repeated at the times recommended in the spray calendars and pamphlets which are issued by both Federal and Provincial Governments and which is given information in regard to the treatment of the different kinds of insects and diseases most likely to cause damage.

The apple scab causes, perhaps, more loss than any other plant disease in Canada, yet this can be controlled and clean fruit obtained, by thorough spraying with either Bordeaux mixture or Lime Sulphur. Other diseases and insects can be kept well under control also by the spray which has been found best for each.

Spraying is a rather expensive operation and it should be done in an intelligent manner, otherwise it may be wasteful money. For instance, insect spray to kill the codling moth which affects the apple, is not applied within a very few days after the flowers fall, the sepals or lobes of the calyx will have closed over the opening of the "calyx cup" in the end of the apple into which it is important to spray the poison. As it is in the "calyx cup" where most of the insects begin work, the apples are not likely to be poisoned. If spraying is delayed and the insects are well advanced, the apples will be wormy. A spray mixture or solution which will control one insect or disease may be of little or no use in

Cakes and Puddings.**

trolling another. Arsenical poisons are the best for biting insects, while soap or tobacco sprays are best for those which suck their food and which have to be killed by contact, and certain sprays intended to kill insects will not control fungous diseases.

Get the spray pamphlets and study them carefully before spraying, but spray and spray thoroughly!

WILL WASTE 1,000,000 MEN.

Germany has declared that it will waste one million men to gain the offensive now in progress. The socialistic and military leaders have conferred and reached an understanding to that effect, also that 1,500,000 men shall be the limit, and the socialists will not stand for the reckless use of men beyond that figure. The socialists have

been given to understand that the objective could be obtained without such enormous losses and are now warning the government that they will not stand for anything over the number of men agreed upon.

London Express—During the British advance on Jericho an enemy tank was an ancient Egyptian relic was a mummified skeleton and revealed a mummified investigation by the official archaeologists connected with the British staff pointed out to the British as being that of a historical figure, John of Artoch. According a cable was dispatched to the War Office in London. "Have discovered the War Office in London," supposed to be that of a "lost of Babylon." The War Office replied: "Can not trace John of Artoch. Send identification disk."

THOUGH a mere land lubber the call of the sea was too strong for W. H. Boswell, of the Passenger Dept., P. R. Charming Cross, London, England, who he joined up but decided to follow the footsteps of his viking ancestors. Followed a period of training at one of Britain's great naval schools, where he was posted to a patrol boat and found his sea legs. That patrol boat proved a handy platform for many naval maneuvers and he was sent ashore to the ocean's wide expanses by the horrible Hun, of her beats with Sun Kendall, the navigation specialist, C. P. O. R. expert, which resulted in the capture of the sea and his children point with pride to the worn by Capt. Kern, whom I helped make March, 1914.
