stands highest in public favor. Its annual sale of 14.000,000 packets proves this.

Sold only in Scaled Lead Packets Black, flixed or Green. 40c, 50c and 60c per Ib. At all [grocers. HIGHEST AWARD ST. LOUIS, 1904

She knew, as though she had heard the bled her father in character, formed words, that Warng-having noticed the understanding between her and the man who was all but her arowed lover, had understanding between her and the man who was all but her arowed lover, had asked him if they were engaged—if it would be interfering with his (Lisle's) rights were he to offer himself to her in this crisis of her fortune. Lisle had, no doubt, disclaimed all wish to make her his wife and coolly given his approval to Waring's pretensions. More, he had not hesitated to recommend his rival! What a reverse to the picture her fancy had hitherto presented, of Lisle vainly strugintherto presented, or Lisle value strug-gling against his love for her-hesitat-ing lest her relatives or herself should not thing him a sufficiently good match for her-of his ecstasy when the time came, and she permitted him to see how dear he had grown. Now behold! the time of trial came, and he was eager to hand her over to another. How could for her-of his eestasy when the time came, and she permitted him to see how dear he had grown. Now behold! the time of trial came, and he was eager to hand her over to another. How could she have been so blind—so deluded? Her against him. Her long slender fingers clutched the arms of the seat with fever-ish force, in her agony and self-contempt. How could she have been so weak, so conceited, as to suppose that she had become all in all to such a man as St. John Lisle? Yet, yet he did admire and seek her! A hundred instances crowded on her memory which might well have misled her; important trifles which could not have occurred had he not loved her at the time. If he had, why did he change so suddenly? What had she done to forfeit the tenderness of which she was so sure? No! She was not all selfwas so sure? No! She was not all self-deceived. He was false, fickle, cruel—she to earn her bread hereafter. She was might be less hard upon herself! Then named, he said, Mona Joseclyn, after her might be less hard upon hersell i nen she questioned the prudence of her own action on hearing his astounding pro-posal. Was it well to have played the part she did, in affecting to entertain it? Would it have been wiser and mor dignified to have rebuked him for his interference, and refused to listen to his plaeding? For the present of the said, Mona Joseclyn, after her mother and her uncle. Mrs. Newburgh answered this appeal by sending for the little bright-eyed six-dignified to have rebuked him for his interference, and refused to listen to his plaeding? For the present of the sending for the little bright eyed six-dignified to have rebuked him for his interference, and refused to listen to his was in the country, and kept by a quiet, by sending for the said, Mona Joseclyn, after her hardened woman caught a breath of the divine consolation human love alone divine consolation human love alone and her uncle. and which all the kingdoms of this world, and the glory of them can bot replace. "I do love you, dear. I will do what-down—something will be arranged for dignified to have rebuked nim for his interference, and refused to listen to his pleading? For the present, every desire was merged in her passionate wish to hide her wounds, and make Liste believe she was as strong, as worldly and as indifferent as himself—that his conduct did not cost her a pang. What a lesson he had taught her of her own insignifi-cance, of the delusion she had trusted, a few months in town and was needed As to poor Waring, she bestowed small consideration on his honest affection for the delusion she had trusted. Though dreadfully annoyed by the con-Though dreadfully annoyed by the con-tertemps, Mrs. Newburgh was struck by Chase, she had taken least notice of him. Their previous intercourse had con-sisted of a few meetings at evening parties, where he had perseveringly asked her to dance, and she had as persever-ingly endeavored to evade him. Of this is chool in Paris, and after in an educa-

at once!"
"Won't you have a cup of tea first, miss? You are looking dreadful bad."
"No, thank you, Hooper."
She went quickly upstairs to her grandmother's room, and, having paused for a second at the door, went-in softly. Mrs. Newburgh sat at a writing table covered with latters, papers, accounts and cheque books—some notes and gold at her right hand. She was wrapped in a morning gown of dark red cashmere, and her gray hair was neatly arranged under her lace cap; but Mona was start-led by the ghastliness of her face. Mrs. Newburgh had borne the wear and tear of' time well, and, having accepted her age without a struggle for youthful ap-pearance, did not look her seventy-six years. Now she might have been a hun-dred. Her cheeks seemed thin and more sunken wrinkles had come about her mouth, the muscles of which were re-laxed into a downward curve; her face was deadly white; her keen dark eyes ware dim and frightened; the hands which lay on the table were yellow and tremulous. Mona's heart thrilled with pity at the sight of such a wreck. "Oh, grannie!—dear grannie!" was all she could say, coming quickly to her, and gathering up the cold, withered hands into her own, as she kissed her cheek. The old lady clasped her almost con-

The old lady clasped her almost con-"I thought you would never come," she whispered, brokenly. "Do you know

she whispered, brokenly. "Do you know that everything is gone?-everything. We can not stay here. This is the last money I can call my own"-and she freed one hand to clutch the gold notes. "I don't seem able to understand the figures or anything. You will not leave me, Mona. Hooper is so cross that" --gathering force by a supreme effort, and speaking with something of her natural decision---'I should in any case dismiss her; for me all is over. I am too old to struggle any longer. I have fought a brave fight, but fate is against me. Mona my child, can you forgive me for losing the little fortune I intended for you. Somebody told me I ought to draw mantic circumstances. Mrs. Newburgh set her face against so disgraceful a union; she dragged her pretty daughter from one continental court to another, and finally tried to force her to marry an Englishman of high position and large fortune. This was too much, and the weak, simple, frightened girl fled to her Scotch lover. Her mother renounced her and never say her fore crait Scotch lover. Her mother renounced her, and never saw her face again. From this time Mrs. Newburgh de-voted herself to increasing her fortune, both by saving and speculating. She re-turned to London, and once more took her place in society.

you. Someoody told me I ought to unaw out of that company-I forget who-I forget all names; but I thought I might wait a little longer, the interest was so high, and I have beggared you. Can so high, and I have beggared you. Can you forgive me?" "Forgive you," cried Mona, sinking on her knees and clasping her arms round her trembling grandmother. "What have I to forgive? Rather let me pray your forgiveness for my want of obedi-ence and submissiveness. Where should I be but for you? I owe you everything. Send away Hooper-I will be your maid, your nurse, your servant-any-thing that can help or comfort you." "Foolish, hasty child," murmured Mrs. Newburgh, laying her hand tenderly on the young head pressed against her. "I belive you love me a little." she asked sharply what good that would doe "He has little enough for himself, and never forgave me for adopting Mona." "But, my dear madam, some steps inust be taken to provide for the future." "I wish nature would provide for me," returned Mrs. Newburgh, with a deep sigh; "I am a helpless incumbrance now." "I am sure no one else thinks so," said the solicitor, soothingly. "Is there not some balance at your banker's that you might place in—say Sir Robert Everard's hand, just to secure some ready money ?" "I will see; I will look into my ac-counts, but for the present I am too tired to discuss anything further." "Mrs. Newburgh could not, however,

Mrs. Newburgh could not, however, suplain of any want of interest on 'ne complain of any want of interest n ine part of her numerous friends and ac-quaintances; she was overwhelmed with letters of condolence, of inquiry, of the most impossible suggestions. They were generally read aloud by her granddaughter, or as much of them as the would lister to constitue the second

granddaughter, or as much of the she would listen to. Sometimes would sit for hours deadly silent. (To be continued.)

> 198 **GROWING BOYS**

Need an Occasionol Tonic to Maintain Strength and Keep the Skin Clear

On every side one sees young men and On every side one sees young men and growing boys with pale, pasty complex-ions, their faces covered with pimples and their, gait shambling and listless. Such a condition is extremely dangerous —the blood is out of order—a complete breakdown may result. To put matters right; to give that spring to the step; that clearness to the skin and that glow of actine health to the face a top is that clearness to the skin and that glow of active health to the face, a tonic is needed—Dr. Williams' Pink Pills are needed. As proof of this, Mr. Charles Diefenthal, 12 St. Ursule street, Quebec, says: "Frequently my studies necessi-tated my remaining up until a late hour. The result was that we contain and we you. Somebody told me I ought to draw

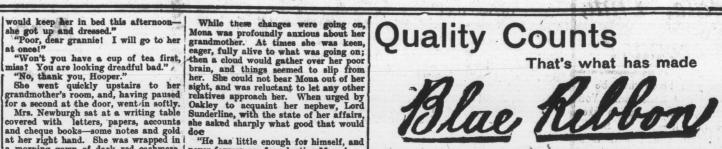

The result was that my system gradually weakened, and in December, 1903, I seemed to collapse. I was completely run down and went under the care of a run down and went under the care of a doctor, but instead of gaining strength, I seemed to grow weaker. I could not take solid food, did not sleep well, and weakening night sweats gave me further cause for alarm. Dr. Williams' Pink Pills were brought to my notice and I began their use. Almost from the outset they seemed to help me, but it was some weeks before there was a ma-

was some weeks before there was a ma-terial change for the better. From that on, however, recovery was rapid, and in a couple of months I was as well as ever I had been, and able to resume my studies."

Every dose of Dr. Williams' Pink Fils makes new, rich, red blod; every drop of pure blood gives strength and vitality to the whole system, and this strength brings health. That is why Dr. Williams' Pink Pills cure such cases as anaemia, all stomach and kidney trouhis antenna, an stomach and kidney trou-bles, St. Vitus' dance, heart palpitation, the affictions known only to growing girls and women, and a host of other ailments from which both young and old suffer through bad blood. Sold by deal-ers in medicine or by mail at 50 cents a hox or six haves 60 \$250 from the ba ers in medicine or by mail at 50 cents a box or six boxes for \$2.50, from the Dr. Williams' Medicine Co., Brockville, Ont

ONTARIO AGRICULTURAL COLLEGE AND EXPERIMENTAL FARM.

Produce.

Farmers visit the college in June and December to the number of nearly 40,-000, and we had last year in attendance at the various College classes 1,004 students.

In the beginning students were paid to attend the institution, and there was practically no revenue from the College or farm. In 1905, we turned into the Provincial treasury as revenue from the College and farm \$61,568.20. The work of the different departments is as follows

follows: 1. Field Agricuiture. Teaching of stu-dents and experimenting with field crops is the work of this department. In Mr. Zavitz' report of last year the following paragraph appears under the head of "Barley": "The results show that the Mandscheuri gave decidedly the greatest yield per acre of the four vari-eties for the whole period of fifteen years, and also for the last five years. The Mandscheuri gave an average of 9.3 The Mandscheuri gave an average o bushels per acre per annum over the common six-rowed barley in the average results for fifteen years. The aver-age area devoted to barley in Ontario from 1882 to 1904 is given as 633,200 acres per annum. An increase of nine bunshels of barley per acre throughout the Province would, therefore, amount to an increase of over five million bushels of barley in Ontario annually. This in-crease at fifty cents per bushel would amount to about two and a half million dollars. Two and a half million dol-lars annually would pay the running expenses of about thirty Agricultural Colleges like the one located at Guelph. The Mandscheuri barley was imported from Russia by the Ontario Agricultural College in the spring of 1889. Not only has it made a very excellent record at the College, but it has given high re-sults in the co-operative experiments throughout Ontario, and has been grown in general cultivation very usccessfully during the past few years. In looking up the records of the Bureau of Indus-tries, we find that the average yield of lion dollars. Two and a half million dol-

tries, we find that the average yield of barley throughout the Province for the period of ten years from 1895 to 1904, in-clusive, is 20.3 bushels per acrc; while that for the period of ten years from 1885 to 1894, inclusive, was 24.85 bushels annual aver age increase of about 41-2 bushels per

The College was established in 1874. Its objects were twofold: First, to train young men in the science and art of im-proved husbandry; and second, to con-duct experiments and publish the re-sults. In 1875, the President said in his first report: "It is evident to the most cursory observer that Canada depends, and will be obliged for many years to depend, largely, if not exclusively, on her raw produce for her national wealth. And amongst the various forms of raw material, none are so valuable as those included under the head of Agricultural Produce.

Physics. In this department are taught the principles of soil cultivation and soil drainage.
 Botany. In this department the subject of weeds and how to destroy them, the question of fungous growth, and when and how to spray to extermin-ate them, the importance of growing

and when and now to spray to extermin-ate them, the importance of growing grasses and clovers, and such things are taken up and discussed. D. Entomology. Again, millions of dollars are lost every year by insect de-predation. Only by studying the life history and habits of an insect can it be properly compared

history and mants of an insect can it be progerly combated. 10. Poultry. Chickens used to sell anywhere on the market from 20 to 30 cents a piece. To day they bring three times that amount, where they have been properly fed, killed and dressed. We have no trouble in disposing of our poul-try here at from 12 to 15 cents a pound dressed and our students can target have dressed, and our students are taught how to breed and feed so as to obtain these results. We have four different styles of poultry houses, to test the effects of heat, and cold on the egg-laying pro-clivities; hence we find that the cold-est and therefore the cheapest house, is the best, and that fresh air, not warn

is the best, and that fresh air, not warm air, is essential to good egg production. 11. Macdonald Institute. Three things are taught: Domestic Science, Manual Training, and Nature Study. In Domestic Science there were 360 girls in attendance last year, each one being obliged to learn cooking, sewing, and laundry work. In a Province where over 90 per cent. of the women do their own housework, what a blessing it would own housework, what a blessing it would be if they were all properly trained for their daily duties. Manual Training makes boys and girls handy in the usa of simple tools, and Nature Study, which is really elementary agriculture, helps teachers in the actor that they may teachers to the extent that they may

teachers to the extent that they may return and give to their pupils an educa-tion that will more nearly fit them for the earning of their daily bread. The college is then doing three things: First, fitting boys and girls for their life work on the farm; second, by expe-rimenting along different lines it is sav-ing the farmers millions of dollars each year by securing for them exact data in reference to the value of different in reference to the value of different farm erops, farm animals, and so forth; and Third, by the writing and publica-tion of bulletins and reports, the farm-er is supplied in his own home with re-liable information in reference to his business.

OIL ALWAYS SCENTED

Lisle, who had so often turned nim into she went to reside with her granamother ridicule. Anything was good enough for in London; she continued to study music a girl who was penniless and almost un- under the best masters, and was always she thought, while her checks glowed, and her heart best fastis, and was always is thought, while her checks glowed, and her heart beat fast— very hard, story she had been presented, her grand-before she would consent to marry him. mother was well satisfied with her social
