HE WAS A NON-UNION MAN.

Was Forced out of His Job and a Suit for Damages Followed.

Buffalo, New York, Jan. 8.—Edward Wunch, linotype operator, was awarded a verdict of \$550 damages against David Shankland, the president of the Typographical Union No. 9, by a jury before Justice Obidts in the Supreme Court. This amount represents Wunch's salary of \$25 a week since June 30th, 1899, when he was discharged from the composing room of the Buffalo Evening News at the behest of the Typographical Union. Wunch instituted an action against Shankland for alleged conspiracy in forcing him out of his position because he refused to join the Typographical Union. After Manager J. A. Butler, of the News, had testified that he considered Wunch a competent man, and wanted to retain him, but was compelled to discharge him in order to prevent a strike, Judge Childs ruled that there was a conspiracy, and the only point to be considered by the jury was the question of damages.

RELIGION'S FREE.

Japan Extends Equal Rights to Christianity.

And Also Exempts the Property of all Clergy—Charges of Corruption.

Yokohama, Dec. 16, via Victoria, B. C. Jan. 8.—The memorial to the throne brought into the Diet this week by the opposition is practically an impeachment of Premier Marquis Yamagata and Home Minister Marquis Yogo for corrupt practices. As the indictment is made by a party which is itself by no means untainted with corruption, and is in a hopeless minority, swift defeat will be the fate of the measure.

The bill for the regulation of religious organizations excites much comment because of its fairness and impartiality. Christianity is no longer merely tolerated, but receives recognition. All religious property is exempt from taxation and religious teachers from conscription. The whole Buddhist sect show an unexpectedly liberal spirit, and are practically united in giving support to the measure.

The plume at Kobe is announced to be suppressed, and a special commission for its treatment has been withdrawn.

The feeling of sympathy and depression among the Anglo-Saxon residents over British reverses in South Africa is very strong, and is largely shared by the Japanese, whose sentiment is strongly pro-British.

AMERICAN GAMBLER

The Government Failed to Suppress his Lucrative Trade.

Pays \$1000 a Day License and at 1 make Money at Gambling

Don Felipe Martel, the famous gambling house proprietor of the City of Mexico, had made a fortune in the business before the government decided to abolish gambling houses by levying on them a license tax of \$1,000 a day. One by one the gambling houses closed, and when the spid was clear Don Felipe Martel approached the authorities with \$1,000 in cash and demanded a day's license. In a few hours his place was thronged. At a single stroke he had won the patronage of Mexico, and his doors have never been closed since. The daily outlay of \$1,000 is not missed from the daily revenue of thousands. His strong religious tendencies are so well known that nobody was surprised when he built in the village of San Angel a church that cost more than \$50,000. The poor people of the vicinity, and many of the rich as well, have come to regard him as a sort of fairy prince. His own style of living encourages this belief. The Martel mansion in the City of Mexico is a magnificent affair, constantly filled with guests. A curious feature is that it contains 40 windows—the number of cards in the Mexican deck.

Enormous Pendulums.

The only structures in Japan which seem to be earthquake proof are the pagodas, which are erected before the temples. There are many which are 700 or 800 years old and as solid as when first built.

There is a reason for this and it lies in their construction. A pagoda is practically a framework of heavy timbers, which starts from a wide base, and is in itself a substantial structure, but is rendered still more stable by a peculiar device. Inside the framework and suspended from the apex is a long, heavy beam of timber two feet thick or more. This hangs from one end of the four sides; four more heavy timbers, and if the pagoda be very lofty still more timbers, are added to these. The whole forms an enormous pendulum, which reaches within six inches of the ground.

When the shock of an earthquake rocks the pagoda, the pendulum swings in unison and keeps the center of gravity always at the base of the framework. Consequently the equilibrium of the pagoda is never disturbed, and this is the explanation of the great age of many of them. When from their height one would suppose them to be peculiarly susceptible to the effects of the earthquake.

For then I truthfully may say
That I am making no mistakes.

PAST RECORD of LIFE SAVING.

Paine's Celery Compound Is Now and Ever Will be the Great Home Medicine.

The past record of Paine's Celery Compound will live long in the hearts of tens of thousands of our Canadian men and women.

They can never forget the fact that it was Paine's Celery Compound that brought back strength, health and new, vigorous life after failures with the many common advertised remedies, as well as with physicians and hospital treatment.

Among the most notable and marvellous records of cures effected by Paine's Celery Compound in the West, just closed are the cases of thousands who had been given up by physicians as hopeless.

These hopeless cases were men and women suffering from kidney and liver diseases, stomach troubles, rheumatism, nervous prostration and long standing dyspepsia—all on the brink of the dark grave.

At the eleventh hour, when hope had fled, and deep, black despondency reigned supreme, Paine's Celery Compound was recommended by some good friend as a last resort.

It did not require weeks or months for Paine's Celery Compound to show its power and virtues. A few hours or days sufficed to convince every sufferer that he or she had in truth found a medicine that could cope with disease and death.

This glorious past record of Paine's Celery Compound as a disease banisher, or has given the wonderful medicine a place in the majority of the homes of Canada, where it is known as "The home physician," "The home protector against disease."

Are you suffering from any of the troubles mentioned above? Are you weak and nervous? Are you sleepless, despondent or morose? Have you periodical headaches, poor appetite, indigestion, or a general feeling of weakness? Paine's Celery Compound can do for you. A bottle or two will give you satisfaction and delight.

The woman who paints her cheeks and the man who dyes his whiskers fool only one person.

BULLET IN HIS BRAIN

Destroyed a Portion of the Thinking Apparatus but Life Remained.

A Remarkable Instance Pointed Out by a Hospital Physician.

A hospital physician pointed out an orderly to a gentleman who was visiting the institution recently and said: "That man has for five years carried around a bullet in his brain. Five years ago he became despondent because of poverty, put a 32 caliber pistol behind his left ear, pulled the trigger and fell apparently dead. The ball made a small, round hole and remained lodged somewhere in his head. A few hours after he was brought here he regained consciousness, and, greatly to our surprise, he made a rapid recovery. The wound was never probed, and no effort has been made to locate the bullet. After he was able to walk about we noticed that he was a trifle irrational—not mad you know—but weak-minded. A considerable portion of his brain must without doubt be entirely destroyed. The human animal is certainly the hardest thing on earth to kill."

A Mistake.

An old gentleman of 80 having taken to the altar a young damsel of 15, the clergyman said to him: "The font is at the other end of the church."

"What do I want with the font?" said the old gentleman.

"Oh, I beg your pardon," said the clerical wit. "I thought you had brought this child to be christened."

Through a Grant of Land to Robert D'Oyley at a Rental of a Tablecloth Yearly.

From the name of Robert D'Oyley originated the word dolly. A grant of land was given to him in the reign of William of Normandy on condition that he should give yearly a tablecloth of at least 3 shillings' value at the feast of St. Michael.

According to the custom of the times, the women of his family were skillful with the needle and felt great pride in embroidering their "quilt rent tablecloths." In time these cloths came to be valuable and were used as napkins at the royal table. They were called "D'Oyleys."
