Chatham is indeed an industrial centre and is known far and near as a progressive and lively business city, offering inducements for manufacturing concerns and business houses. The Maple City stands on an equal footing with any other city of its size in the province.

Chatham citizens as a rule realize this and are proud of it, but there is one thing in which they take | and when liquid rub a little of it over an especial pride, probably because the edges of the soles where the stitches it is brought to their atention more than the others, and that is our splendid stores and magnificent store fronts. In this respect Chatham stands far above many of the other cities in Ontario, with the same population. This is particularly noticeable to visitors from surrounding towns and cities who, as soon as they walk down King street, are invariably struck with our handsome business houses. The new store on King street, saresy erected by the McKeough's, which will be occupied by John Northway & Company, proes to be a valuable addition to Chatham in this respect, and future visitors to the Maple City will have the privilege of seeing one of the largest and finest dry goods stores

The building is situated on the Mc-Western Ontario. Keough estate, on one of the most favorable parts of King street. Two stores have been made into one, which has been fitted up with quart- cisco bay.

The Crooked Jordan. Jordan is one of the crookedest rivers known. In covering a distance of sixty miles, for that is the length of a straight line drawn on the map between the sea of Galilee and the Dead sea, it runs 212 miles because of the multiplication of its windings.

Hairbrushes.

Hairbrushes need a weekly cleansing, for which purpose use a quart of tepid water containing a tablespoonful of cloudy ammonia. Dip the bristlesnot the back-several times, rinse and stand on edge to dry.

Pewter Making. Pewter making, one of England's important industries seventy years ago, has almost been abandoned. Cheap glassware and tinware have driven pewter from the market.

Burning Oil.

If a lamp should be overturned, don't attempt to put out the fire with water, for it will simply spread it. Instead throw down flour, sand, garden earth or salt, either of which will have the desired effect.

SAVED HIS CAPITAL.

A Bank President Who Did Not Forget His Old Time Friend.

"Come in in the morning, and the bank will have something for you to do," said the president of a Broadway bank to a meek looking man whose hair was white and whose eyes were marked by deep crow's feet as he left the office, with a bright look of satisfaction on his face that had not been there before.

"Let me tell you a story," said the president as he motioned to me to remain. "I was living in Iowa, and three city lots composed the capital that I looked to to give me a start in business. I held on to them for a long time while working for \$35 a month in a real estate office until they had advanced in value to \$3,000, when I sold them to a St. Louis man.

"It was nearly 3 o'clock, and I hurried to the bank. I made out the deposit slip and laid it, with my gold and bankbook, in front of the receiving "'It is closing time now,' he said,

and disappeared in the vault with them. In a minute he was back, and I was astonished at his actions. "'I have put it in my private box,' he continued, 'where it will be safe, and in the morning you can make the deposit if you want to.' "Next morning the bank's failure

was announced. "I hurried to Charley's house, which was near by, and asked him about the

"'Yes, it has failed and won't pay a cent,' he said. 'Just five minutes before you came in with your money yesterday the directors decided not to open this morning. I was told to give out no information until business hours today, and that is the reason I didn't tell you. If you had made your deposit, the money would have all gone. Now it is safe in my box, and you can have it any moment you please.' "I did get it, and it was the founda-
