The Appetite
Water in Food.
The action of water in our food, says a medical writer, is very important. There would be no carrying of food into the system but for the agency of water. It dissolves everything that we take, and nothing that we take as food can become nutriment that is not dissolved in water. It would not do to test that by taking things and putting them into water and seeing whether they dissolve, and rejecting them as food according to that circumstance; because food undergoes a considerable change in the stomach. It undergoes a change, to begin with, in our mouth. One of the great objects of that change is to render things soluble in water. Starch, which would be insoluble in water, is changed by the saliva into sugar, and that which would be insoluble in water is changed by the saliva into sugar. Starch, which would be insoluble in water, is changed by the saliva into sugar, and that which would be insoluble in water is changed by the saliva into sugar.

IMPROVED
my bowels were regulated, and by the time I finished two boxes of these Pills my tendency to headache had disappeared, and I became strong and well.—Darius J. Logan, Wilmington, Del.

BY USING
three boxes of Ayer's Pills, and at the same time using the ointment, I was completely cured. My digestive organs are now in good order, and I am in perfect health.—Philip Lockwood, Topeka, Kansas.

Ayer's Pills
were of the Pills by the use of Ayer's Pills. They not only relieved me of that painful disorder, but gave me increased energy, and restored my health.—John Lazarus, St. John, N. B.
