Coal production in Canada showed a gratifying increase last year. The total output of all kinds of coal was 16,968,568 tons. This represented an increase of 21.9 per cent. over the previous year and a record in the history of the Canadian industry. More extensive working of the lignite mines in Alberta was mostly responsible for the increase. Alberta produced 41 per cent of the total output. There has been no steady increase in production over the last ten years, however. In 1910 it was 13,216,515 tons for the Dominion and the yearly output since then has sometimes been below and sometimes above that figure.

Pictou Train Derailed

Pictou, March 19.—John L. Ferguson, engine driver, of Pictou, was killed and several members of the train crew were injured when the short line express No. 34 from Oxford Junction to Pictou ran into an open switch at Urganhart's Siding, about two miles from Tatamagouche, last night. The engine turned completely over, crushing the driver in his seat and hurling the fireman from the tender into a swamp by the side of the track. Conductor Anthony Calder, Clifford Campbell, Ross McPherson, James Rogers, Jas. McKinnon, John Chisholm, Benjamin Hunsphrey, L. E. Doon and Alex McLellan received injuries.

The two cars next the engine left the rails and went over at an angle of forty-five degrees. The first and second class cars held the track, and none of the passengers were injured.

Railwaymen say the circumstances are such as to argue a deliberate attempt to wreck the express.
