OPPOSITION TO NEW LAND BILL

Winnipeg Loan, Land, Mercantile and Manufacturing Interests Oppose Pre-emption Principle.

Ottawa, June 30.—Sir Wilfrid Laurier received today an important memorial from Winnipeg addressed to the Governor-General-in-Council, and Parliament, objecting to the new act in amendment to the Dominion Lands Act and urging certain modifications. The memorial asks as follows: "This association, representing financial, manufacturing, wholesale, mercantile, lumbering, loaning and landed interests of Western Canada, after the fullest consideration of the bill to consolidate the acts respecting the public lands of the Dominion as brought down to Dominion parliament by the Minister of the Interior, protests in the strongest possible terms against the pre-emption and purchase of homestead features of the bill as having an unsettling effect on farmers where permanently located in Western Canada, and certain to result, to some extent, in the conditions existing during the continuance of the old pre-emption act, when many settlers immigrated from the original locations to the injury of business and permanent development."

It would urge and recommend that all Dominion lands, old as well as new sections in all parts of Western Canada, be thrown open for free homesteads, that being in the opinion of this association the policy best adapted for the rapid and permanent development of Western Canada tending to advance, rather than injure, its material interests, and best adapted to promote large immigration.

The government should consider it advisable to finance the construction of the Hudson Bay railway from the proceeds of its lands, this association would suggest that as at present the case of school lands, a certain proportion of the lands be set aside for this purpose and sold by auction to the highest bidder. This association would point out to the government that the bill in its present form would leave the settler taking advantage of its provisions as to purchased homesteads in the position of having two farms, each remote from the other and that consequent development of such would be difficult if not impossible.

Furthermore, the provisions by which settlers, who have already acquired the privilege of securing an interest in the land, are to be defined by the bill, is in direct opposition to the assumption underlying its pre-emption and purchase homestead provisions, that assumption being that within the tract so defined a farm of 160 acres is necessary for satisfactory farming.

Upon due consideration of the reason given above, the government decides that it cannot change the pre-emption principle embodied in the bill, this association would suggest the following changes for the purpose of minimizing as much as possible its injurious effects: "Eliminate from the bill the purchased homestead feature, or, largely restrict the area for purchased homesteads, confining it to those portions of Southeastern Alberta and Southwestern Saskatchewan, generally restricted to the extent of the semi-arid region of the western provinces, or make the price for purchase homesteads nearer the intrinsic value of the land and make one-fifth of this price payable with the application and the balance in five equal annual instalments thereafter. As at present drafted the bill would permit a man to enter either for pre-emption or purchase homestead, and after three years and then abandon it without having contributed to the Dominion anything for his use of part of the public domain, and in the meantime having debarred a permanent settler from residence and cultivation; or make statutory provision as to purchased homesteads the same as to pre-emption, that is, confine it to those townships within the area defined in the bill in which the railway companies have not selected eight sections as part of their land grant. If these changes in the bill be printed, they would do somewhat to lessen the injury it would do, if permitted to pass into law in its present form. If the government decides to adopt the essential recommendations made by this association, and founded on the experience of its members, it would urge in the strongest possible manner the adoption of the modifications suggested above."

London, July 2.—Twenty-seven out of twenty-nine women suffragettes, arrested yesterday during the suffragist demonstrations before the House of Parliament, were charged in the police court this morning with obstructing the police. Those against whom previous convictions had been entered were ordered to pay a fine and give security for good behavior for one year or pass three months in prison. BARBARITIES AT TABRIZ. Undisciplined Tribesmen Are Taking Part Under Shah's Sanction. St. Petersburg, July 1.—Eighty men were reported killed in a battle yesterday at Tabriz, Persia, details of which are just received, in which it is stated that the situation continues to become more serious. People have erected barricades in the streets and the light is going on night and day.

One of the prisoners just released from the rural camp in the fighting at Tabriz, a Russian, describes the barbarities committed on the soldiers there. The prisoner says a churchman was strangled before the eyes of his prisoners who were to be released. When half dead the cord was released and the Shah's executioners began cutting in the neck of the victim with blunt knives. The carcass was then thrown to hungry dogs.

Homestead under Rachen Kahn are taking a leading part in the fighting and this fact is increasing the alarm of the inhabitants. Rachen Kahn's men are mostly surrounding Tabriz.
