## Father of Fountain Pens.

tain pen made in 1864.

This pen was patented in that year by Jean Benoit Mallat, an engineer, and the firm that still carries on the business founded by him asserts that it was the first fountain pen ever my mule, her business founded by him asserts that fetlocks curry- it was the first fountain pen ever

Mallat was the inventor of the gold pen with the ruby point, perhaps the easiest writing and most durable nib ever put on the market. But it is necessarily expensive. In 1843 Mallat substituted iridium as a point for his pens. At the same time he provided a reservoir for the ink. This was the germ from which grew the idea of storing ink in the handle.

Mallat's fountain pen differs only slightly from our modern ones. It was self-filling, but the flow of ink was regulated by a little turn-screw on the side. This, however, was soon given

## Kept Too Cool.

extensive journey in the provinces, took his wife with him. Being exceedingly nervous about fires, he frequently impressed upon her the necessity of keeping a "cool head" should ever the danger occur.

At one hotel they were staying at a fire actually broke out. The commercial traveller roused his wife, assitted her to dress, and, to demonstrate the value of presence of mind, ed to-day at BEARNS', 30 cents reached for his frock coat, silk hat and umbrella, and accompanied his vife into the street. There they watched the firemen in their work of subdu-

ing the outbreak. "And now," remarked the husband to his wife, "you see the advantage of having a cool head." "Yes, John," was the reply, "but you

## might have put your trousers on." What the World Needs.

More men who can nut the same enthusiasm into the work of their shop office, or factory as they put into football or cricket matches.

More women who will give their hearts to ideal home-making, who do not mind roughening their hands over housework, who can turn out wholesome dinners as well as smart hats and jumpers.

More coal dealers who are the they are!

Preachers who can show crippled and paralyzed souls how to reach to the old ideals. More teachers who educate their

oupils to do more than pass exams. More doctors who are more inter ested in cases than in fees.

## Thieves Buried Alive.

A correspondent sends the follow-

In Ha Tony, a little village just north of Canton City, there lived one Tsao Ah Sum. There was shrewd suspicion that he had stolen many I was (says Mile. Boland) visiting a oxen—fifteen to be precise. The ox friend in Paris, and my host's little is a sacrosanct beast of burden, and under village law to steal one is a capital offence. Tsan Ah Sum stole his last ox a month or two ago, and when the hue and cry went out he fled. He was eventually caught and he had to face trial before the elders of three villages, for he had not confined his depredations to his immediate neighborhood. He was found guilty and given the maximum penalty, namely, to be buried alive. On the day of the execution the village watchmen beat the gongs and all the young men of the village gathered around a rectangle eight feet deep. Before Tsao Ah Sum was invited to made his resting-place in the hole he was feasted with wine and meat while the elders performer sacrifices for the benefit of his soul. The rite being ended two watchmen lowered Tsao Ah Sum into the hole, head downwards, and while all the young men and spectators sho watchmen of another village shot at the convict with a native gun loaded with shot which pierced the body of the victim in numerous places.
