LONDON, FRIDAY, FEB. 2.

THE REPROACH OF MONTREAL.

Two years ago the decent citizens of Montreal were congratulating themselves on a good day's work in turling from the city hall a gang of proved corruptionists, and in replacing them by a "reform" administratilon. This year ten of the twenty three members of the gang had the impudence to solicit again the suffrages of their fellow-citizens and five of them had their claims allowed. The twenty-three aldermen were reported by Justice Cannon to have been guilty of conspiring to allot city contracts to friendly middlemen at prices enormously in excess of those charged by the real working contractors. One middlemen named Brunet secured a commission of \$100,000 over the contractors' charges. Positions in the civic service were brazenly bought and sold. Six of the twentythree aldermen who belonged to the ring, were declared by Justice Cannon to be guilty of malversation, but not one was exposed to a criminal prosecution. The ringleader, ex-Ald. Giroux, has just been re-elected in spite of the opposition of all the Eng-Ush and most of the French newspapers, of the Citizens' Committee which organized the reform campaign two years ago, of the temperance organizations, of the women's clubs, and of all the forces of decency. Another successful candidate for the council. Mederic Martin, had been reported, like Giroux, for malversation. The three re-elected were not reported guilty of

mous "rake-offs" were collected. There was a dereliction of duty somewhere in the failure to follow Justice Cannon's report by legal action against Giroux and his gang. Instead of being grateful for this forbearance, the corruptionists have presumed on it to lift their heads again, trusting to the shortness of public memory, and to their professional skill in election arts. The reformers are still in control, but the partial success of the grafters is a warning to the citizens of Montreal that eternal vigilance is the price of conest municipal government.

WESTERN ONTARIO DISCRIMIN-ATED AGAINST.

In the president's report for 1911 of the University of Toronto there are some interesting figures as to the geographical distribution of the attendance.

Out of 1,086 students in arts at University College itself 502 come from the province as a whole, 424 from Toronto. How do you like that, Western Ontario? You have about half the population of the province, or a million people, nearly three times the number of Toronto, and you are paying your full quota to the support of the provincial university largely in order to educate the citizens of

The one faculty of Toronto University that is not overcrowded by Toronto students is that of education; in Toronto they don't go in for the lowly profession of teaching school. It is rather amusing that out of 46 students in the faculty of forestry, 14 come from the province and 20 from Toronto! Perhaps the biggest disproportion in favor of the capital city is in the faculty of household science. Of 85 students registered in 1911, 27 are from the province, 58 from Toronto.

The province pays for its share of university education, but it is mostly grabbed by the city which holds the Government. Toronto makes no to say there is not a Presbyterian in grant to its university. But London is being called on to endow the Western University before the Government is even to think of granting a red cent of the taxes from this part of the Province towards maintaining a university that is convenient to this region, Proximity is clearly the reason rule in the sphere of church governfor university attendance. That is why Central and Eastern Ontario are educationally better off than the west. They have Toronto and Queen's Universities in full running. Here is the Western, half-alive, though doing good story: work in the departments which it has

There is the difficulty of deciding whether separate schools shall be permitted in the part of Keewatin to be annexed to Manitoba.

The Government will not deal with the naval question this session because it bristles with difficulties. There is the difficulty of managing the Nationalists, who want no naval expenditure, the ultra-Imperialists who are urging a gift of money or ships to the mother country, and the genuinely Canadian Conservatives, like Premier McBride, of British Columbia, who demand a Canadian navy.
