A MOTHER'S DUTY TO HER DAUGHTER

Her Health Must Be Carefully Guarded as She Comes to Womanhood.

Every mother who calls to mind her own girlhood knows how urgently her daughter is likely to need help and strength during the years between early school days and womanhood. Then it is that growing girls droop, become fragile, bloodless and nervous. Nature is calling for more nourishment than the blood can supply, and signs of distress are plainly evident in dull eyes, pallid cheeks, weak and aching backs, a languid step, fits of depression, nervousness and a dislike for proper food. These signs mean anaemia—that is bloodlessness.

The watchful mother takes prompt steps to give her girl the new, rich blood her Dr. Williams' Pink Pills, because so many thousands of feeble, anemic, unhappy girls have been transformed into robust women through the rich, red color these pills actually make. No other medicine has ever succeeded like proved their worth. The case of Miss Marguerite Boisclair, St. Jerome, Que., proves the truth of these statements. Miss Boisclair is sixteen years of age, and says that since the age of thirteen or fourteen she had been afflicted with extreme weakness, and seemed to be going into a decline. The least effort left her weak and breathless, so that she was unable to do any household work. She

had no appetite, suffered from terrible headaches, dizziness and sometimes fainting spells. She was under medical treatment, but made absolutely no improvement, in fact, seemed to be steadily growing weaker. When her case seemed most hopeless a lady friend advised the use of Dr. Williams' Pink Pills. After taking a few boxes she began to gain new strength, and after the continued use of the pills for about two months she was again as well and strong as ever she had been, and has since enjoyed the best of health.

Sold by all dealers in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.
