

They Keep the Cold Out

...BRICK SET....

The Famous ...LITTLE OX... Wood Furnaces

Are the most powerful Furnaces of their class on the market. They are made with both Double and Triple Return Flue Radiators, and either portable or stationary for brick setting. They take 3 feet rough wood, are smoke and dust proof, particularly easy to clean and regulate, and sell at a very moderate price. You will be sure of satisfaction with one of these powerful and reliable Furnaces.

Woodstock, Ont.

Robes and Coats

We have had much more experience in Canada, with an increased sale every year, which is due to better conditions than ever before. There have been no sales by Liverpool, London, Marconi, and hundreds of others from ocean to ocean, and one need say that they are the robe of the future. The robe is made in one piece, therefore no seam to rip, and it is strong as leather. A superior class of lining joined, and it is reinforced with roller cloth, making it both wind and waterproof. It is also moth-proof, easily cleaned after being wet, does not get hard like a silk robe, and has no offensive smell.

Received medal and diploma of decorative mention at the World's Fair.
For sale in all leading towns and villages in the Province of Ontario, and see that every robe bears our name.

NEWLANDS & CO.
Galt, Ont.

If, when buying fencing, you want the very best, take the time tested Page Coiled Spring. If you wish a nice little picture book, apply to the nearest Page Fence agent, or write to the Page Fence Co., Limited, Walkerville, Ont., and it will be mailed to you free.

Ensilage Cutting...

On the up-to-date farm ensilage is now an absolute necessity. Ensilage is easily and quickly made if you have the right machine. The new Massey-Harris Roller Bearing Ensilage Cutter with Coil Spring Pressure applied to feed roller, and other improvements, is an admirable machine. Carriers are furnished in 8, 12, 16, 20 and 24 ft. lengths, and upwards in multiples of 4 ft.

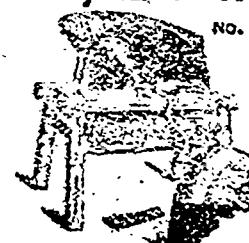

New Massey-Harris Roller Bearing Ensilage Cutter.

Massey-Harris Straw Cutter

adapted for straw
cutter, hay cutter,
silage cutter, and
has a capacity of
up to 100 bushels
per hour can be in
operation, and the feed
reversed by touching
a lever, thus avoiding
back log.

Massey-Harris Root Cutters and Pulpers

are sold in sets
in various sizes
and are general
farmers. These
machines are
designed to
be operated
by steam
or gas
power
they run with
great ease and
do their work
perfectly. No
part of the
machinery
is exposed.

Root cutters reversible, one edge being toothed for pulping.
