POTASH

FOR ALL CROPS.

ON ALL SOILS.

Potash is an Indispensable Plant Food.

No soil will produce a maximum crop unless it contains a supply of available POTASH sufficient for the crop's requirements. POTASH is the dominant ingredient in a fertilizer for Potatoes, Tobacco and most Fruit and Vegetable crops and is essential to all other crops.

MURIATE OF POTASH and SULPHATE OF POTASH

can be obtained from the leading fertilizer dealers and seedsmen. Buyers of "Ready-Mixed" fertilizers should purchase brands containing a high percentage of POTASH.

A new edition of "ARTIFICIAL FERTILIZERS, THEIR NATURE AND USE" has been prepared. This is a complete treatise of 80 pages on this important subject and contains a complete index. This is a most helpful bulletin in the intelligent study of fertilizers and the fertilizing of the various crops. It will be sent FREE on request, together with any of the following:

- "The Principal Potash-Crops of Canada."
- "Fertilizing Orchard and Garden."
- "Fertilizing Grain and Grasses."
- "The Potato Crop in Canada."
- "Fertilizing Heed Crops."
- "Farmer's Companion."

STATE WHICH YOU REQUIRE.

GERMAN POTASH SYNDICATE
