

# GAST & ATCHISON'S Improved Mineral Wool Steam Pipe and Boiler Covering.

(Samkin's Patent)

**IS THE ONLY FIRST-CLASS COVERING MANUFACTURED IN THE DOMINION,**  
Being far superior to Asbestos, Cement, Hair, Felt, or any of the so-called non-conducting coverings. We respectfully call the attention of all architects and builders to our MINERAL WOOL COVERING, representing it as absolutely indestructible from any inside heat, and the best non-conductor of heat, and invite your most thorough and critical examination and proof of its merits by any test you may apply to it, and on its merits solely we introduce it. It is easily and rapidly applied and removed by any one not skilled in plumbing, and we guarantee satisfaction.

## GARTH'S PATENT Sectional Hot Water and Steam Radiator

Patented in 1880 in Canada and the United States.

**THE BEST HOT WATER RADIATOR IN THE MARKET.**

Quick Circulation; Easily Repaired; Its Capacity increased at very little cost; does not need a fancy cast iron top or marble slab; in fact, just the radiator that suits the requirements of the market.

By the construction of this Radiator, each section has (entirely distinct from each other) a separate and positive circulation within itself, producing not one slow, sluggish, continuous circulation, but as many sharp and constant circulations as there are sections composing the Radiator, thereby maintaining a greater heat from a given surface. It has another advantage that will be appreciated by the Trade: the inlet and outlet are both at the same end, and has been arranged that it may be used for Hot Water or Steam without making any changes to the connections, or any alterations whatever—a feature possessed by no other Radiator that we are aware of. We also claim that with this Radiator any person in the trade can replace a section, or add sections to increase its capacity, without returning it to the manufacturer. This alone is an advantage, particularly in cases outside the city in which manufactured. These Radiators are now fitted up in the following buildings, viz. Hull Post Office, Facerborough Post Office, Picton Custom House, N. S.; Pictou Marine Hospital, N. S.; Winnipeg Custom House, Kingston Custom House, Three Rivers Custom House, Point St. Charles Post Office, and many other private dwellings.
