

The Passport Office Examiner Training (POET) Committee has recommended increased examiner training to promote consistent, effective and efficient examination of passports. Training is particularly important in the long run to ensure that professional personnel will be able to carry out the Passport Office's plans for the future.

With the participation of the management team, a long-term Strategic Plan for the Office is currently being developed to reflect these ideals. The plan will provide well-framed strategies that will help the Office respond more readily to the challenges of the future.
