

- (i) construction and operation in all municipalities having sewer systems of waste treatment facilities providing levels of treatment consistent with the achievement of the water quality objectives, taking into account the effects of waste from other sources;
  - (ii) provision of financial resources to assist prompt construction of needed facilities;
  - (iii) establishment of requirements for construction and operating standards for facilities;
  - (iv) measures to find practical solutions for reducing pollution from overflows of combined storm and sanitary sewers;
  - (v) monitoring, surveillance and enforcement activities necessary to ensure compliance with the foregoing programs and measures.
- (b) *Pollution from Industrial Sources.* Programs for the abatement and control of pollution from industrial sources, including:
- (i) establishment of waste treatment or control requirements for all industrial plants discharging waste into the Great Lakes System, to provide levels of treatment or reduction of inputs of substances and effects consistent with the achievement of the water quality objectives, taking into account the effects of waste from other sources;
  - (ii) requirements for the substantial elimination of discharges into the Great Lakes System of mercury and other toxic heavy metals;
  - (iii) requirements for the substantial elimination of discharges into the Great Lakes System of toxic persistent organic contaminants;
  - (iv) requirements for the control of thermal discharges;
  - (v) measures to control the discharge of radioactive materials into the Great Lakes System;
  - (vi) monitoring, surveillance and enforcement activities necessary to ensure compliance with the foregoing requirements and measures.
- (c) *Eutrophication.* Measures for the control of inputs of phosphorus and other nutrients including programs to reduce phosphorus inputs, in accordance with the provisions of Annex 2.
- (d) *Pollution from Agricultural, Forestry and Other Land Use Activities.* Measures for the abatement and control of pollution from agricultural, forestry and other land use activities, including:
- (i) measures for the control of pest control products with a view to limiting inputs into the Great Lakes System, including regulations to ensure that pest control products judged to have long term deleterious effects on the quality of water or its biotic components shall be used only as authorized by the responsible regulatory agencies, and that pest control products shall not be applied directly to water except in accordance with the requirements of the responsible regulatory agencies;
  - (ii) measures for the abatement and control of pollution from animal husbandry operations, including encouragement to appropriate
