will drive sheep over in the summer. It has been done, and is to be done again. But it is useless for me to go on telling all the occupations that would pay high profits. The future of the Northwest country is not so long as that of a country that can look forward to other industries than mining and the business that depends on mining, but it is longer than the lifetime of any of us. The surface has been pricked in a few places, but I do not know

that the best has been found, and I am quite sure no one has any idea of the tremendous extent of the placer diggings, to say nothing of the quartz that is sure to follow. Then, all the other metals, silver and copper and iron, have been turned up, while coal is plentiful. I believe thoroughly in the country. All I have doubt about is the character of some of the men who are rushing in to get rich by just picking up the gold.
