5. INSTRUCTION.
6. INTELLECTUAL TRAINING.

London: LONGMAN, BROWN, GREEN, and LONGMANS.

"Mr. Reid entertains just views of his subject, and writes earnestly and well."—*ATHENÆUM*.

"Mr. Reid's treatise is one of the ablest and most satisfactory that has yet appeared on this important subject; we cordially recommend it to all who are interested in the education of the young."—*LITERARY GAZETTE*.

"A useful manual for the schoolmaster and tutor. . . . He comes forward as another stout opponent of the purely classical and mathematical system of education."—*CRITIC*.

"This thoughtful and well-written volume. . . . It is especially suited to the correction of some narrow, partial, and prejudiced views which still linger in the popular estimate of the range and means of a sufficient education."—*NONCONFORMIST*.

"Mr. Reid has addressed himself to existing difficulties and existing possibilities in an earnest, liberal, and philosophical spirit, and his little book abounds with acute observation and practical suggestions."—*LEADER*.

"The chapter on the nature of the being to be educated is very valuable. . . . The principles to be observed in the practice of teaching are clearly enunciated, and to each is appended a short but lucid exposition."—*PAPERS FOR THE SCHOOLMASTER*.

"The work is one of a very high character, and we know of no class of educators, of whatever age or experience, who may not reap great advantage from a careful study of the volume. It contains a vast deal of clear, sensible and well arranged matter, and embodies most valuable suggestions and directions for the teacher."—*SCOTTISH EDUCATIONAL AND LITERARY JOURNAL*.

"One of the best contributions our educational literature has received for some time."—*THE SCHOOL AND THE TEACHER*.

"Mr. Reid's remarks are practical, and suggestive of much good."—*EDUCATIONAL TIMES*.
