#### **Mining Stocks** THE ONE BEST Bought and sold Speculative Buy

Within thirty days we look for the Porcupine boom to be in full swing, with stock prices advancing by leaps and bounds. The higher-priced securities of proven mines are beyond the reach of many investors, but there are many smaller Porcupines that have the same chance to make good that Mohawk did at Goldfield (from 10 cents to \$20); or Crown Reserve at Cobalt (from 10 cents to \$4.25.)

In our opinion, Gold Spot, now 10 cents a share, is the one best speculation in the camp, and might readily prove the means of converting dimes into dollars. See "THE LETTER ON PORCUPINE" for reasons. Sent free.
