Sixteen months resident in Rossland, B.C. MINES AND STOCKS-Special attention given to Rossland and Ymir Mines. 61 Victoria-St., Toronto Latest information and prices on

DUNDES, KENNETH ("Tamarack"), LERWICK ("Elise").

Watch LERWICK ("Elise"). The Company on Aug. 1 made an advance in the price of their stock, so satisfied were they with the splendid showing in the tunnel, now in over 300 feet. I advise buying now before a further rise takes place. Other good buys are DUNDEE and KENNETH (Tamarack).

In addition to the DUNDEE and LER WICK (Elise). I advise buying KENNETH (Tamarack). In advise buying MENNETH (Tamarack). The Rossiand Miner recently reported that the company's engineer had just returned from an inspection of the mine, and while there let a contract to deepen the shaft another 60 feet. Average assays taken went \$17 to the ton. It is calculated that there are 14.000 tons of ore in the body just exposed. Cutting this down one half and subtracting the cost of mining treatment, it will leave a profit of \$60,000.

Having reliable agents in Rossland and Ymir, I am in a position

to supply any correspondent with information regarding British Col-

umbia properties, in addition to knowing the position and standing

ABOUT THE DEER PARK MINE

Upon It Depends the Future of Ross-

lues Increase as Depth Is Attained-Equipment With an Electrical Plant-News About Ymir

Inasmuch as upon the success or failure of the Deer Park mine depends the fame of the south ore belt of Rossland, a condensation of an article which recently appeared in The Miner should prove of interest to many readers. The north belt has been proven by the development of the War Eagle—Le Rol group and the Deer Park will soon tell us what there is in the southern zone.

outhern zone. -Never in the history of the Deer Park Never in the history of the Deer Park was the property in such splendid shape as at present. The shaft is now down 200 feet, and in the bottom of it is five feet of excellent shipping ore, giving values ranging around \$24. Although the property has been opened by a vertical shaft, and only a modicum of drifting has been carried out, yet the mine has the unique record of containing no inconsiderable ore reserves, for in the short drifts at the 100 and the 150-foot levels there has been opened some 1700 tons of good quartz, which by sorting three into one would give values of \$20 and better. The real amount of the ore at these two levels is unknown, as the drifts were inerely of an exploratory character, and both when discontinued were in good ore.

The property is a fine instance of the

ore at these two levels is unknown, as the drifts were merely of an exploratory character, and both when discontinued were in good ore.

The property is a fine instance of the theory that values in the Rossiand camp will improve with depth, and the adherents of that belief can point to it with complete satisfaction. There is an immense surface showing on the claim, much resembling in its character the superficial appearance of the best known properties of the complete of the complete depth of the complete satisfaction. There is an immense in capital of the complete of the complete satisfaction of the claim, much resembling in its character the superficial appearance of the best known properties of the complete of the complete satisfaction. There is an immense in capital spectral and the complete satisfaction in the complete satisfaction. There is an immense in capital spectral and the complete satisfaction in the complete satisfaction. There is an immense in capital spectral satisfaction in the complete satisfaction in the complete satisfaction. There is an immense in capital spectral satisfaction in the complete satisfaction in the complete satisfaction in the complete satisfaction. There is an immense in capital spectral satisfaction in the complete satisfaction. The satisfaction is an approach and the satisfaction in the complete satisfaction in the comp DLLAND - AMERICA LINE NEW YORK AND THE CONTINENT. rdam, Amsterdam and Boulogne Sailings, nd weekly thereafter.
R. M. MELVILLE,

nadian Passenger Agent, corner To and Adelaide. HAGARA FALLS PARK & RIVER RY. cutting the ledge is carried on systematically at the lower levels of the property. The present ore body, in which work is now being conducted, has been encountered since the 200-foot level was left, and the bottom of the shaft is now in ore that is being sorted for shipment. It is of this ore that the recent phenomenal assay of \$22,040 in gold was secured. The mineral carrying such values was, of course, tellurides, for no other compound found in this camp would give such returns, and the Deer Park is one of the few properties here in which teliurides are met. Regarding the nature of its ore, it is one of the most interesting claims in the district, for while, as was previously said, sugar quartz is the chief component of the auriferous rock, yet white iron, arsenic iron, copper pyrites, iron pyrites, tellurides, molybdenite and bismuth are all encountered, and it is no uncommon thing to see half a dozen of them occurring in one small sample of rock from the lower workings of the property. Generally the more mixed the character of the ore, the better are the values carried.

Upon the advice of Mr. Roy H. Clarke, the engineer, the mine will be equipped with an adequate electrical power plant, the resolution of the property. arge open electric cars, skirting the CANADIAN SIDE onnecting at Queenston with steamers ppewa and Chicora.—C. shaft with an 18-foot lead of well mineralized quartz, which assays from \$6 to \$10 in gold and copper. No. 5 has a 75-foot shaft and shows a pay streak of two feet of solid ore. The leads on the Woodside and Cronch Hall can be traced 1200 feet. A 35-foot shaft on the Woodside shows three feet of heavy sulphide of iron on the foot wall side and four feet of a rich decomposed quartz on the hanging wall side of the vein. There has been over 350 feet of shaft and 400 feet of cross-cutting and ditching done on this group. Mr. McDonald has been working very hard to put this property on a paying basis and it looks as if his efforts would soon be crowned with success. The manager of the company is expected to arrive in Ymir about Sept. 1 to inspect the property, when arrangements to inspect the property, when arrangements will be made for the building of a wagon road to the mine. After this is done, many the state of the mine of the many the state of the mine of the many the state of the sta
