THE THIRTY-THIRD SESSION
OF THE
TORONTO SCHOOL OF MEDICINE,
IN AFFILIATION WITH
THE UNIVERSITY OF TORONTO.

The thirty-third session of the Toronto School of Medicine will open on Friday, October 1st, 1875, and will close on April the 1st, 1876.

Students will find it to their advantage to be present at the opening Lectures of the School.

The members of the Faculty have great pleasure in announcing that they have secured the commodious building formerly occupied by the Late Medical Faculty of Victoria College, and the Lectures will be given therein during the coming session. In removing, the authorities of the School had in view the best interests of their students, who on account of their nearness to the Toronto General Hospital will be enabled to benefit to a greater extent than heretofore by the clinical advantages which that Institution offers to the Medical Student. Instruction in Practical Chemistry will be given in the Laboratory of University College as in former years, but Prof. Croft will deliver the lectures on Chemistry in the new building of the Toronto School of Medicine.

A full course of clinical instruction will be given in the Toronto General Hospital by the different members of the staff. The number of patients in the Hospital is largely on the increase, ranging from one hundred and sixty to one hundred and ninety, and the advantages to the student are proportionately augmented. The Trustees of the Hospital are now making extensive alterations, which, when com-
