PROMPT AND EFFECTIVE.

It is pleasing to note a marked difference, already, in the promptness, courtesy and attention to business of the Ottawa departments, as compared with the red tape circumlocution indifference and neglect, not to say contempt, so often exemplified by the late regime, in dealing with western matters especially. It will hardly be necessary to specify instances of the neglectful and contemptuous treatment that Westminster has received from the departments at Ottawa under the late Conservative administration, in connection with urgent representations made time and again, during the last few years, in regard to the navigation of the Fraser river and the fisheries of the river. In some cases, that will be recalled, telegrams to the departments did nor receive even the courtesy of an answer. That sort of thing has been changed,

however, we are glad to say. As was announced, a few days ago in these columns, the Dominion government snagboat, Samson, was lately said up for repairs, and several buoys, at the same time, have been displaced, at the Sand Heads, by the high water, and require immediate replacing. Mr. Aulay Morrison, our new member, after communicating the state of things to the resident engineer at Victoria, without any practical result, wired yesterday morning to the public works department at Ottawa, stating the case and asking for immediate attention. In the afternoon of the same day he received the The management of the Delmonico following answer from the chief engi-

Another instance, not only of the business-like and effective attention to the wants of the constituness and attention to business at Ottawa is at hand. On Thursday last, through Mr. J. S. Clute, inspector of customs, Mr. Morrison called the attengraph, to the necessity of a custims officer at Steveston, both as a convenience to shippers and to prevent smuggling. there being no such officer stationed between Vancouver and Ladner, though Steveston is a busy hive every summer with a poulation of over five thousand. The attention of the Dominion government was called to this matter early in the year, by the canners and by the inspector of customs, but without effect. To the representation on Thursday, however, an answer was received the same day, and Mr. Morrison, armed with the authority to make the appointment, went down to Steveston on Monday, and appointed Mr. James Beer, late of this city, who accepted, and was up to-day to be sworn in and receive his instructions.

These facts speak for themselves and need no further comment.-Columbian.

The wound given Josiah Brown proved fatal within a few minutes. That of Joseph Brown, though less serious, is a deep one and caused a profuse loss of blood, which the doctors say will make it doubtful if he can recover. On the 26th of May the Marquis of Lansdowns read a similar letter from Her Majesty to the House of lords, and after a few remarks from Lords Brougham and Rosedale, the address was put and agreed to nem. con. After the Act of Settlement the historic old house entered upon a career of usefulness by temporarily housing the Vernon collection. In 1859 the sum of £15,000 was voted for fitting the house as a residence for the Prince of Wales, it having become rather dilapidated; and as time went on it became necessary to prepare it for the reception of the Prince and his youthful bride, who took possession in the month of April, 1863, as inscribed over the fireplace in the saloon.

In the confession book of a Norfolk lady, it is said, the Princess of Wales has left a record in her own handwriting of two facts. One is that her favorite art is millinery; the other that her favorite employment is "minding her own business." PARIS' NEXT EXHIBITION.

London Times: The organizers of the exhibition of 1900 have launched a financial scheme which would seem senseless if they could not count on the passion for lotteries. They have announced the issue of 3,250,000 bonds of 20f. each. The 65,000,000f. thus produced, coupled with the subsidies from the Paris municipality and the state, amounting to 100,000,000f. are to be employed in starting the building operations.

AN AID TO CURING ALCOHOLISM.

We believe that the best authorities are generallly sceptical as to their being any sure cure for confirmed habits of inebrity, unless the effort in that direction be aided by a strong exercise of the will of the unfortunate subject of this bad habit. There are, however, many remedies recommended as aids in diverting or in a minor degree, satisfying the appetite for strong liquors, which are undobtedly of great advantage in some cases, and one of these is recommended by a self-styled 'rescued man.' 'I was one of those unfortunates given to strong dring. When I left off I felt a horrid want of something, I must have or go distracted. I could neither eat, work nor sleep. Explaining my affliction to a man of much education and experience, he advised me to make a decoction of ground quassia, a half ounce steeped in a pint of vinegar, and to put about a small teaspoonful of it in a very little water and to dring it every time the liquor thirst came on me violently. I found it satisfied the cravings, and it suffused a feeling of stimulus and strength. I continued this cured, and preserved till the thirst was conquered. THE ARTILLERY COMPANIES.

The Honorable Artillery Company of London is one of the oldest military organizations now in existence. King Henry VII granted it a charter in 1537. To know its history is to know the home history of England since the time of the Tudors. It is the only English military body whose existence depends solely upon the pleasure of the ereign. The imperial parliament has no control in its affairs. During the great struggle between the king and the parliament it supported the latter. 1660 its commanding officer has been the king or a prince of the royal blood. Its support of Cromwell caused it to be distrusted and disliked during the reign of Charles II and James II. Parliament gives it no grant. Its income ately called—and his baby brother comes from properties and from an Prince Albert Frederick, leave York equal annual levy from each member of rank and file. Both companies, though seldom called out for active service, have done their duty nobly in their respective countries in the hour of need. Keeping themselves prepared for possible trouble, they have not forgotten that peace has also its victories; and the sight of 200 Americans being entertained by the old parent company in London looks very much like an assurance that true friendship ought to exist, and will exist, between the two great English-speaking nations of the world.
