the people—mapy who, at first, gave it strenuous opposition being now among those who are assisting to work it successfully. Like all improved means of accomplishing desirable ends, however, it has its objectionable features, when contrasted with the system which preceded it, and one of the strongest of these is the increased cost of the books used. This is amatter whichessentially, "comes home" to everybody and the leasening or removal of the cause of of the Board of Education. Of course a certain class of people will complain whenever they feel obliged to buy books or anything else requiring an outlay of noney, but it is too true that the prescribed school books cost more than they are worth and the fact disarms those who might, otherwise, feel disposed to use their influence against the outcry made against the law in this respect. The Printers' Miscellany comes to us and claims, very fairly that the Board

The Miscellany says:—
With the Free Schools came the necessity for a uniform series of school books. This was a contingency our Government of the day make any efforts to have the deficiency supplied here; but, instead, by some curious coincidence, almost immediately an Edinburgh firm (T Nelson & Sons) was prepared to furnish the necessary books through a Halifax bookseller, "by and with the consent and approval of the New Brunswick Board of Education." Mark that. This same Board of Education now withholds their "consent and approval" from our publishers, and are not disposed to accept anything produced by

for they cannot but know that in con-tinuing the present mode of supplying school books, they are perpetrating a most gross injustice upon the people of this Province, and one that will most surely be brought up and felt at the next election, if not sconer.

All that is asked is a fair field and to monopoly. Our publishers do not

given and none taken for non-compliance with these wishes, for almost everything is in favor of it, even the cost of the books. There are publishers here who are willing (but it should not be necessary) to enter into an agreement to the effect that they will manufacture and sell these books as well and OHEAP-BE (from 25 to 30 per cent.) than they are sold at present. We have no hesitation in pronouncing the prices now charged exorbitant beyond all measure, and that is putting it very mildly. So much for the mechanical production.

Now, as to the literary matter, contained in these books, it does not strike us "authority in the land—(laughter)—for that it would be a grevious job to get up as good, if not better, in the same way as these were, for they are nothing more than compilations, and some parts of them very poor at that. The

amount of money involved in this matter is of vast proportions, but the various ways in which it is levied and collected are so intricate that it is almost impossible to arrive at an accurate estimate of the amount paid for these books by this Province.

Let the printers, publishers hook.

Representations have repeatedly been made to members of the Local Government concerning this matter, and relief has been promised; still things are going along as usual and there seems to be no remedy forthcoming. The Government (which is the Board of Education) would seem to be bound in this matter, hand and foot, by some invisible power of unquestioned strength, for they cannot but know that in continuing the present mode of sumplying.

With a reminiscence of Julius Casar, whom the Premier resembles only in being ambitious and unscrupulous, Sir John indulged in the following fine burst of elo-

"I cannot forget that in the same month of November six years ago the Government of which I was the head was forced from its position, but we wrapped ourselves in our mantle, and fell, I hope with dignity, certainly without a murmur.

DEAR SIR.—I append below a list of thrown him over-board. But now it is the parish and in presence of Mr. Landry Such a centre of practical study withto say on the supposition that I did take such active part. He says I say nothing about my voting, and I would like to know what he himself has to say on that quires a bold strike to be made from was over Mr. Ryan told a certain man that he would have an investigation after that he would have an investigation after the election was over and did he do so? No! Mr. Walsh was too useful a tool in an quires a bold strike to be made from hand. And what did Mr. Ryan do after the election. He could find no man in all Caraquet to superintend building of a few blocks save Mr. Walsh and Walsh gave them to his brother at ten or twelve hun dred dollars, although there were several dred dollars, although there were several tenders lower than his, and after it was finished allowed his brother \$150 mors than the contract for "lumber"—a very useful word with Mr. Walsh. It may be worth while to mention also that Walsh's brother had at the same time over two thousand dollars worth of contracts. And what did Mr. Ryan next do? He gave him the selling of logs for a bridge on a by road in Shippegan as there was no man there fit to trust with the work. And what did Walsh do then? He sold a part of the logs and gave the rest to his worthy what did waish do then? He sold a part of the logs and gave the rest to-his worthy brother to get and allow what he pleased for them and all this under Mr. Ryan's notice. That is the investigation Mr. Ryan held, but he cannot see these SUBSCRIBER.

A Man Who Has Risen.

Sir George Elliot, M. P., addressing the students at Durham University, said the pportunities for education were much a very dull boy-(laughter)-but the way he made up for that -he was speaking nov of more than forty years ago-was by hard work. The period to which he referred was what he had often considered to be a sort of border land in his life. Between the ages of eighteen years and twenty years his deficiency in education, and acquired that amount of knowledge which had helped him through life, and which he might say, was the sole thing which had enabled him to take the position which he now occupied. (Applause.) At that time ke eight hours a day, and on every day in the week. He travelled from a place called Pensher to the Arcade, in Newcastle. He went through the farthest door on the right hand side of the Arcade, and at the top of the stairs he found three rooms. One was occupied by John Buddle, Thomas occupied by John Buddle, one by Thomas Sopwith, and the other by Peter Nicholson. Peter Nicholson was by far the most important mathematicians in this district, if not in this country—one of the most important mathematician, at any rate. And it was there, during a period of twelve months, after having worked his day's work, going down the pit at 2 o'clock in the morning, that be went to learn mathematics and algebra; and it was after passing that little borderland in his life that he was able to get beyond the local position at which otherwise he would naturally have stopped.

Is IT INCREASE !- Sir John A. Mac donald solemnly assured Mr. John Boyd, of St. John, that there was to be no increase of taxation. The St. John Teles graph, in an artice on the iron duties, says: graph, in an artice on the iron duties, says:

"We have before us two invoices of iron, largely made up of nail, rod and boiler plate. The blacksmiths, boiler makers, etc., are large consumers of these goods. The duties paid at the St. John Custom House on these invoices were \$1,529.25; the old duties on the same lot would have been \$469.75; the increase is \$1,059.50."

SANFORD'S RADICAL CURE For CATARRH A

This may certify that I have been a subject of that terrible disease, Catarih of the Head and Throat, for some 59 years, caused by taking cold in the month of June, 1825. The attack at that time was so severe that the doctor and my friends thought I must die. For years and years I have been so sick that life has been a burden to myself and friends. It is useless for nie to say how many doctors I have tried, how much, medicine I have taken, during all these years of endices emidering, but those who suffer as I have soffered will know that I never ceased to look for relief, and to try every remedy that promised it.

In September, 1876. I began the use of Sanyoan's Radical Curs for Catarien No sponer did I begin to use it them my symptoms changed. It cleared my throat, it cleared my bead is away that nothing ever before given me by document of this wonderful medicine those who have known me for years cau testify. And now, alr to make a long story short, I will say I would not exchange the system of the story of of the
